

**SYRUP PACKAGING FOR KIDS**

Secondary packaging for syrup bottles, which after purchase remains to the child to play with.

The material used is three-layer cardboard.

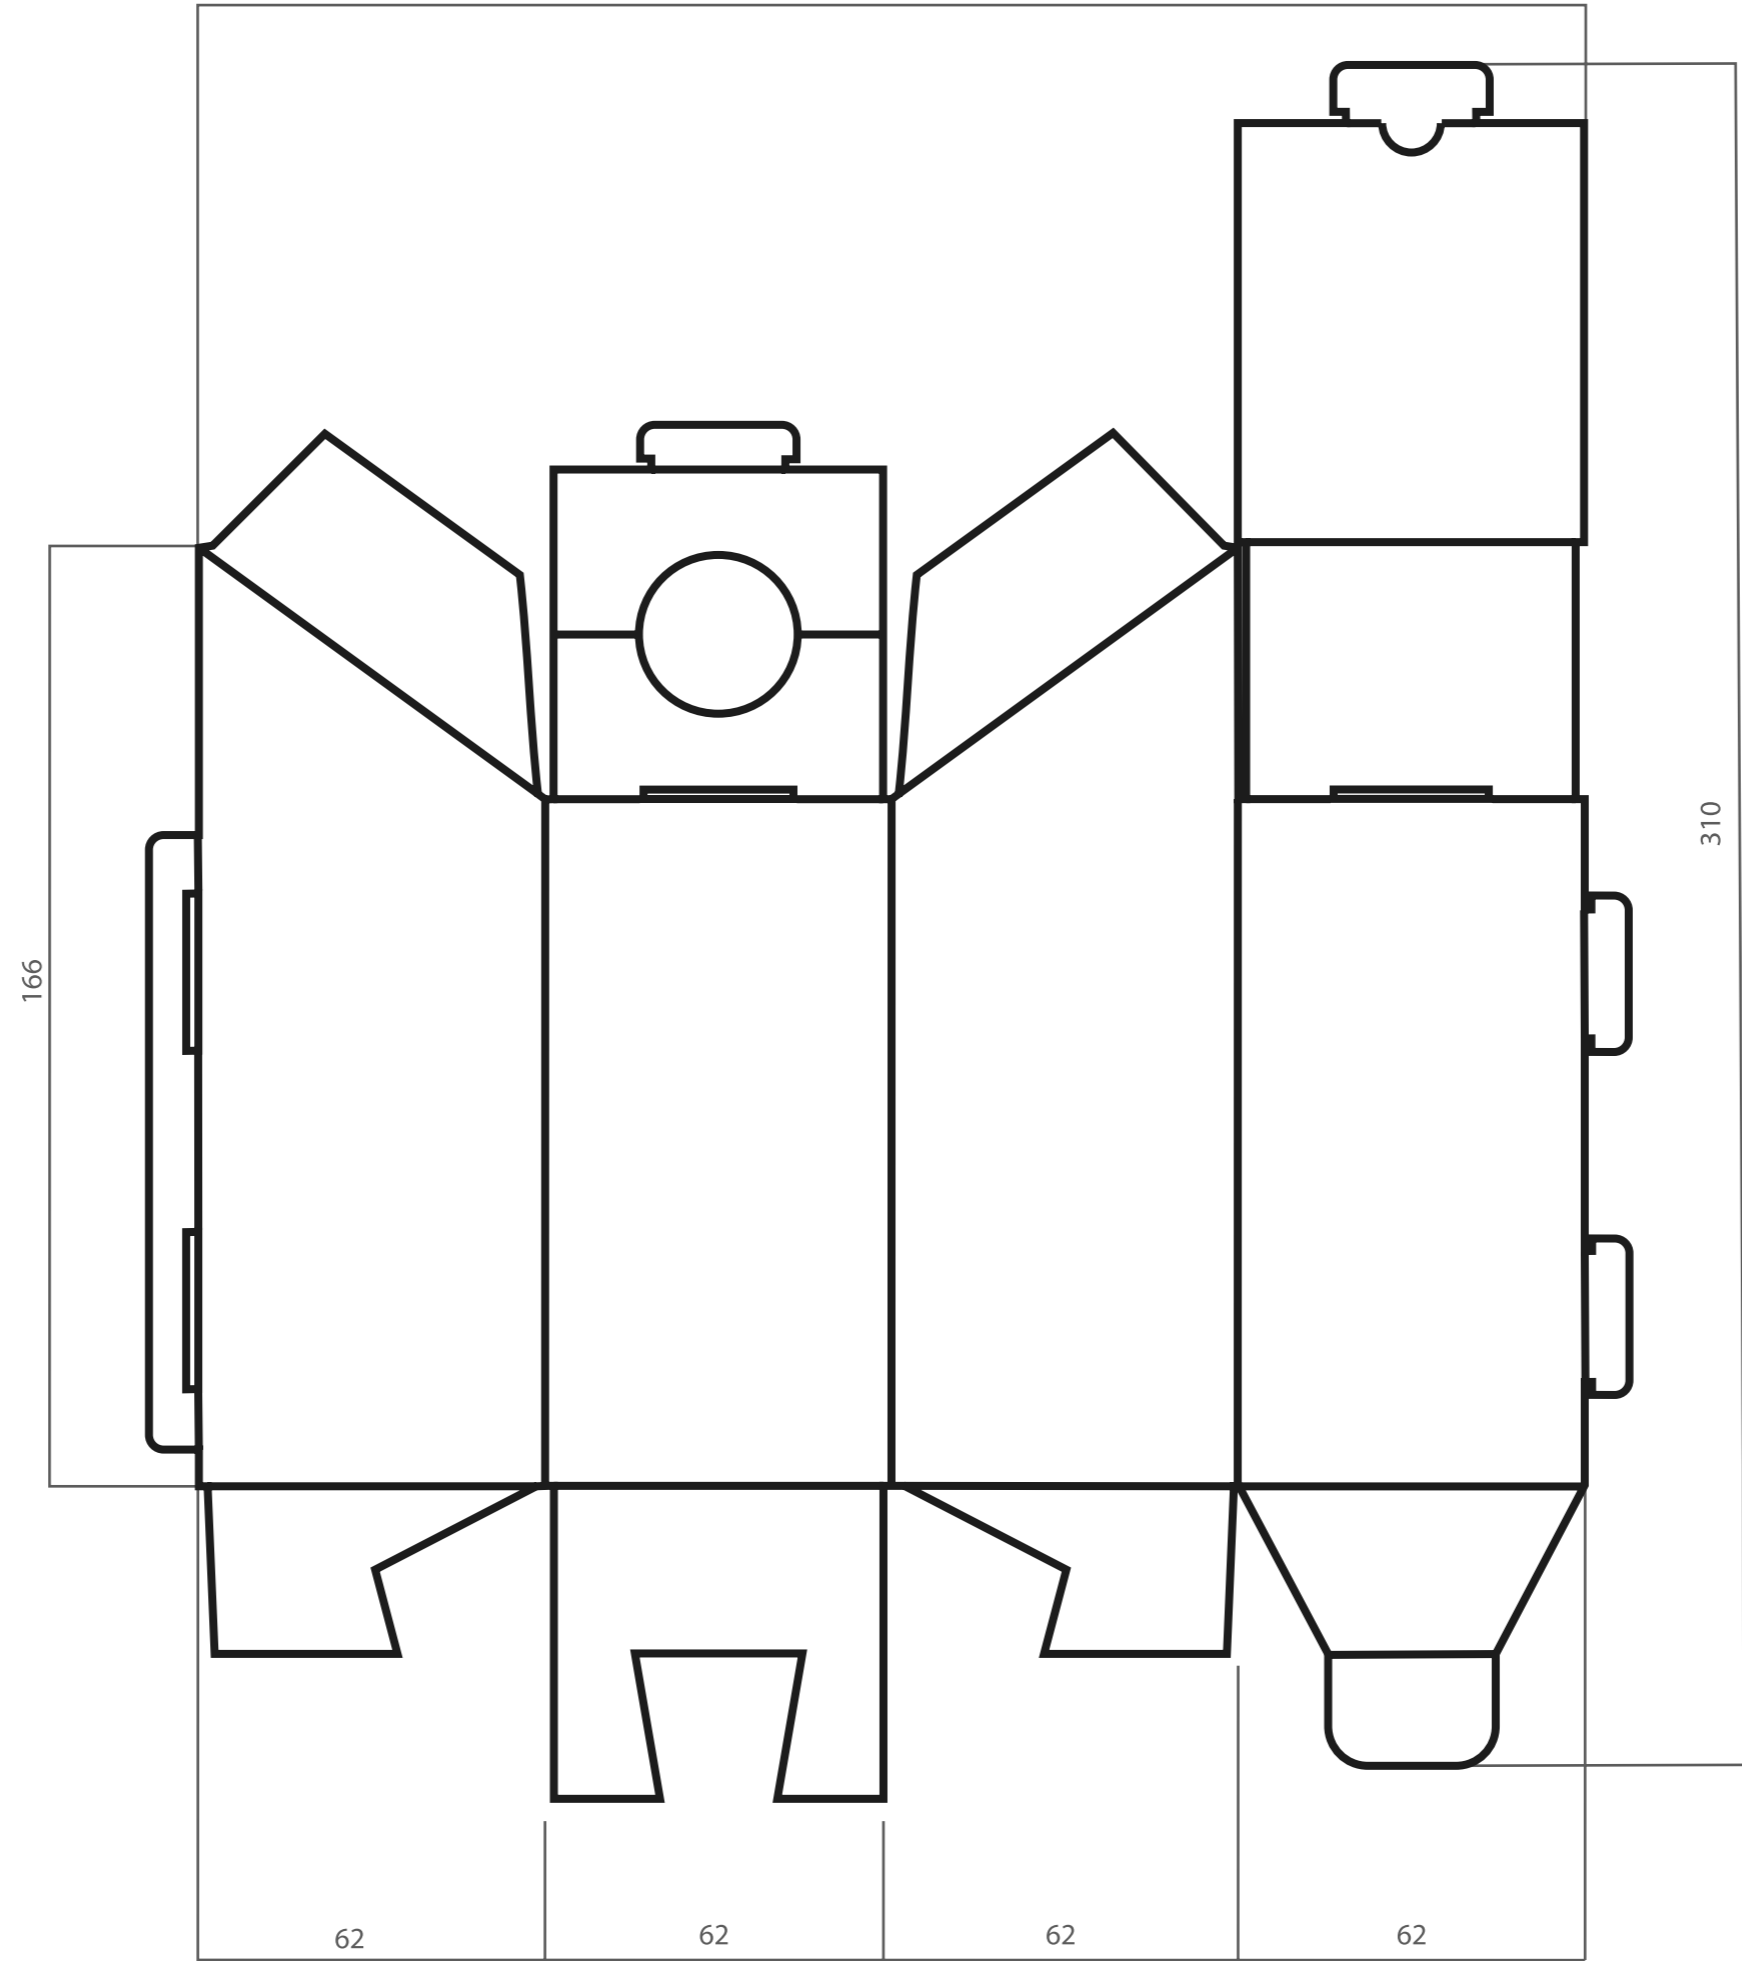

These houses can be lay out in a row, where they form one street.

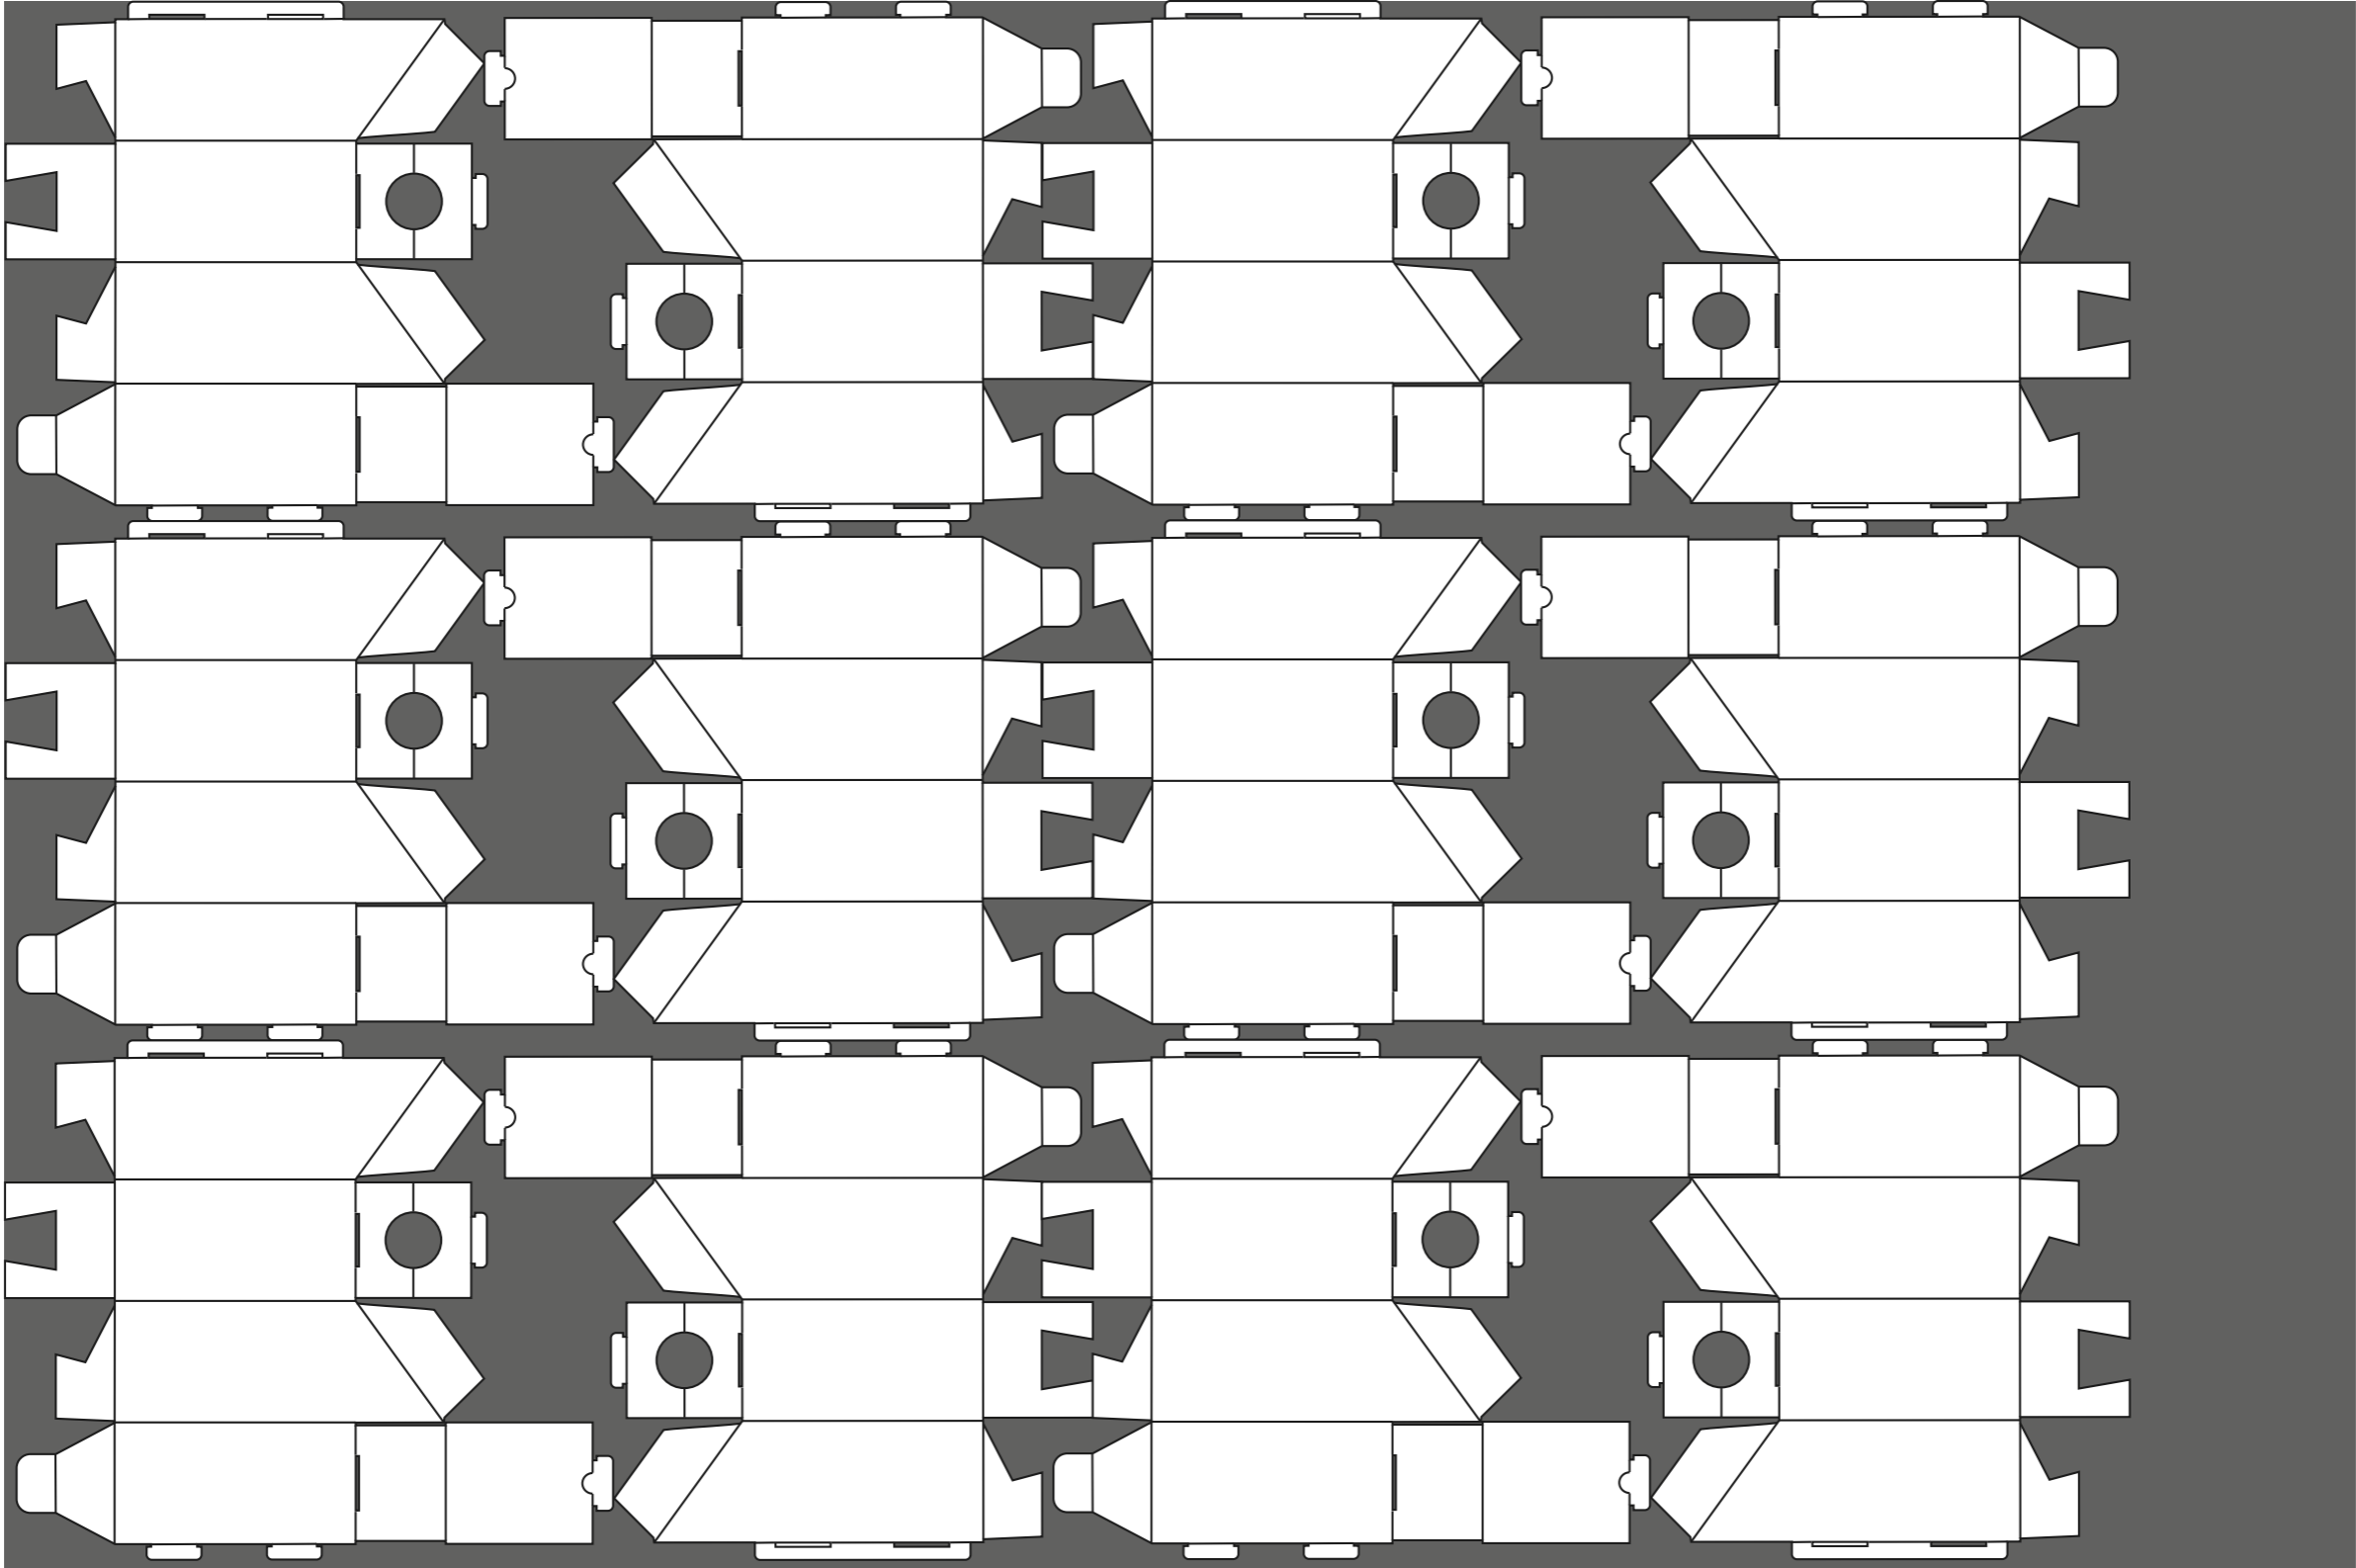

The second way is stacking against each other at the store. The roofs come together to form a whole house.

The inside of the package is a coloring book.  
The child himself can draw or color the interior of his house.
