

Young package

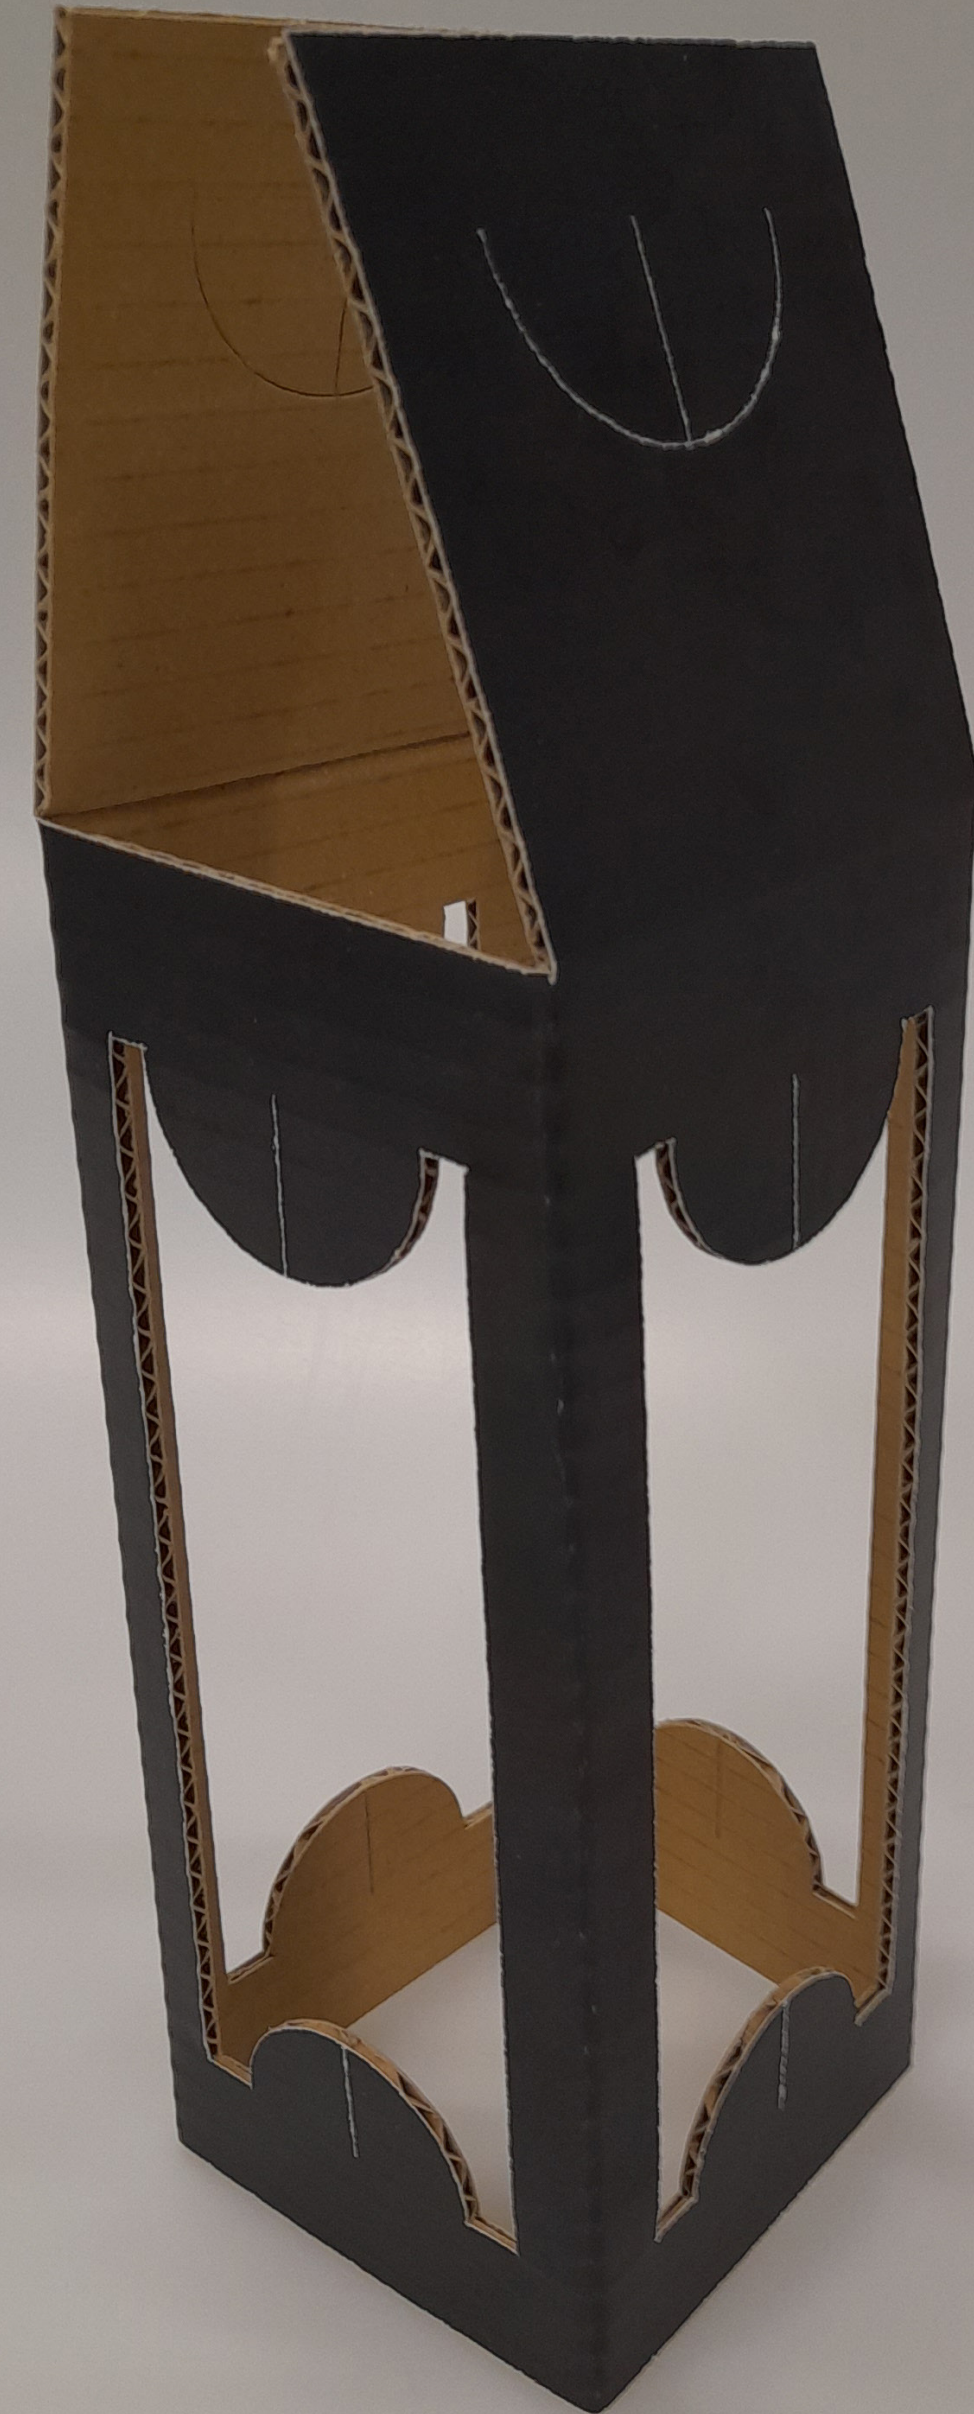

Packaging for cans

ADE Martin Bielik 2023

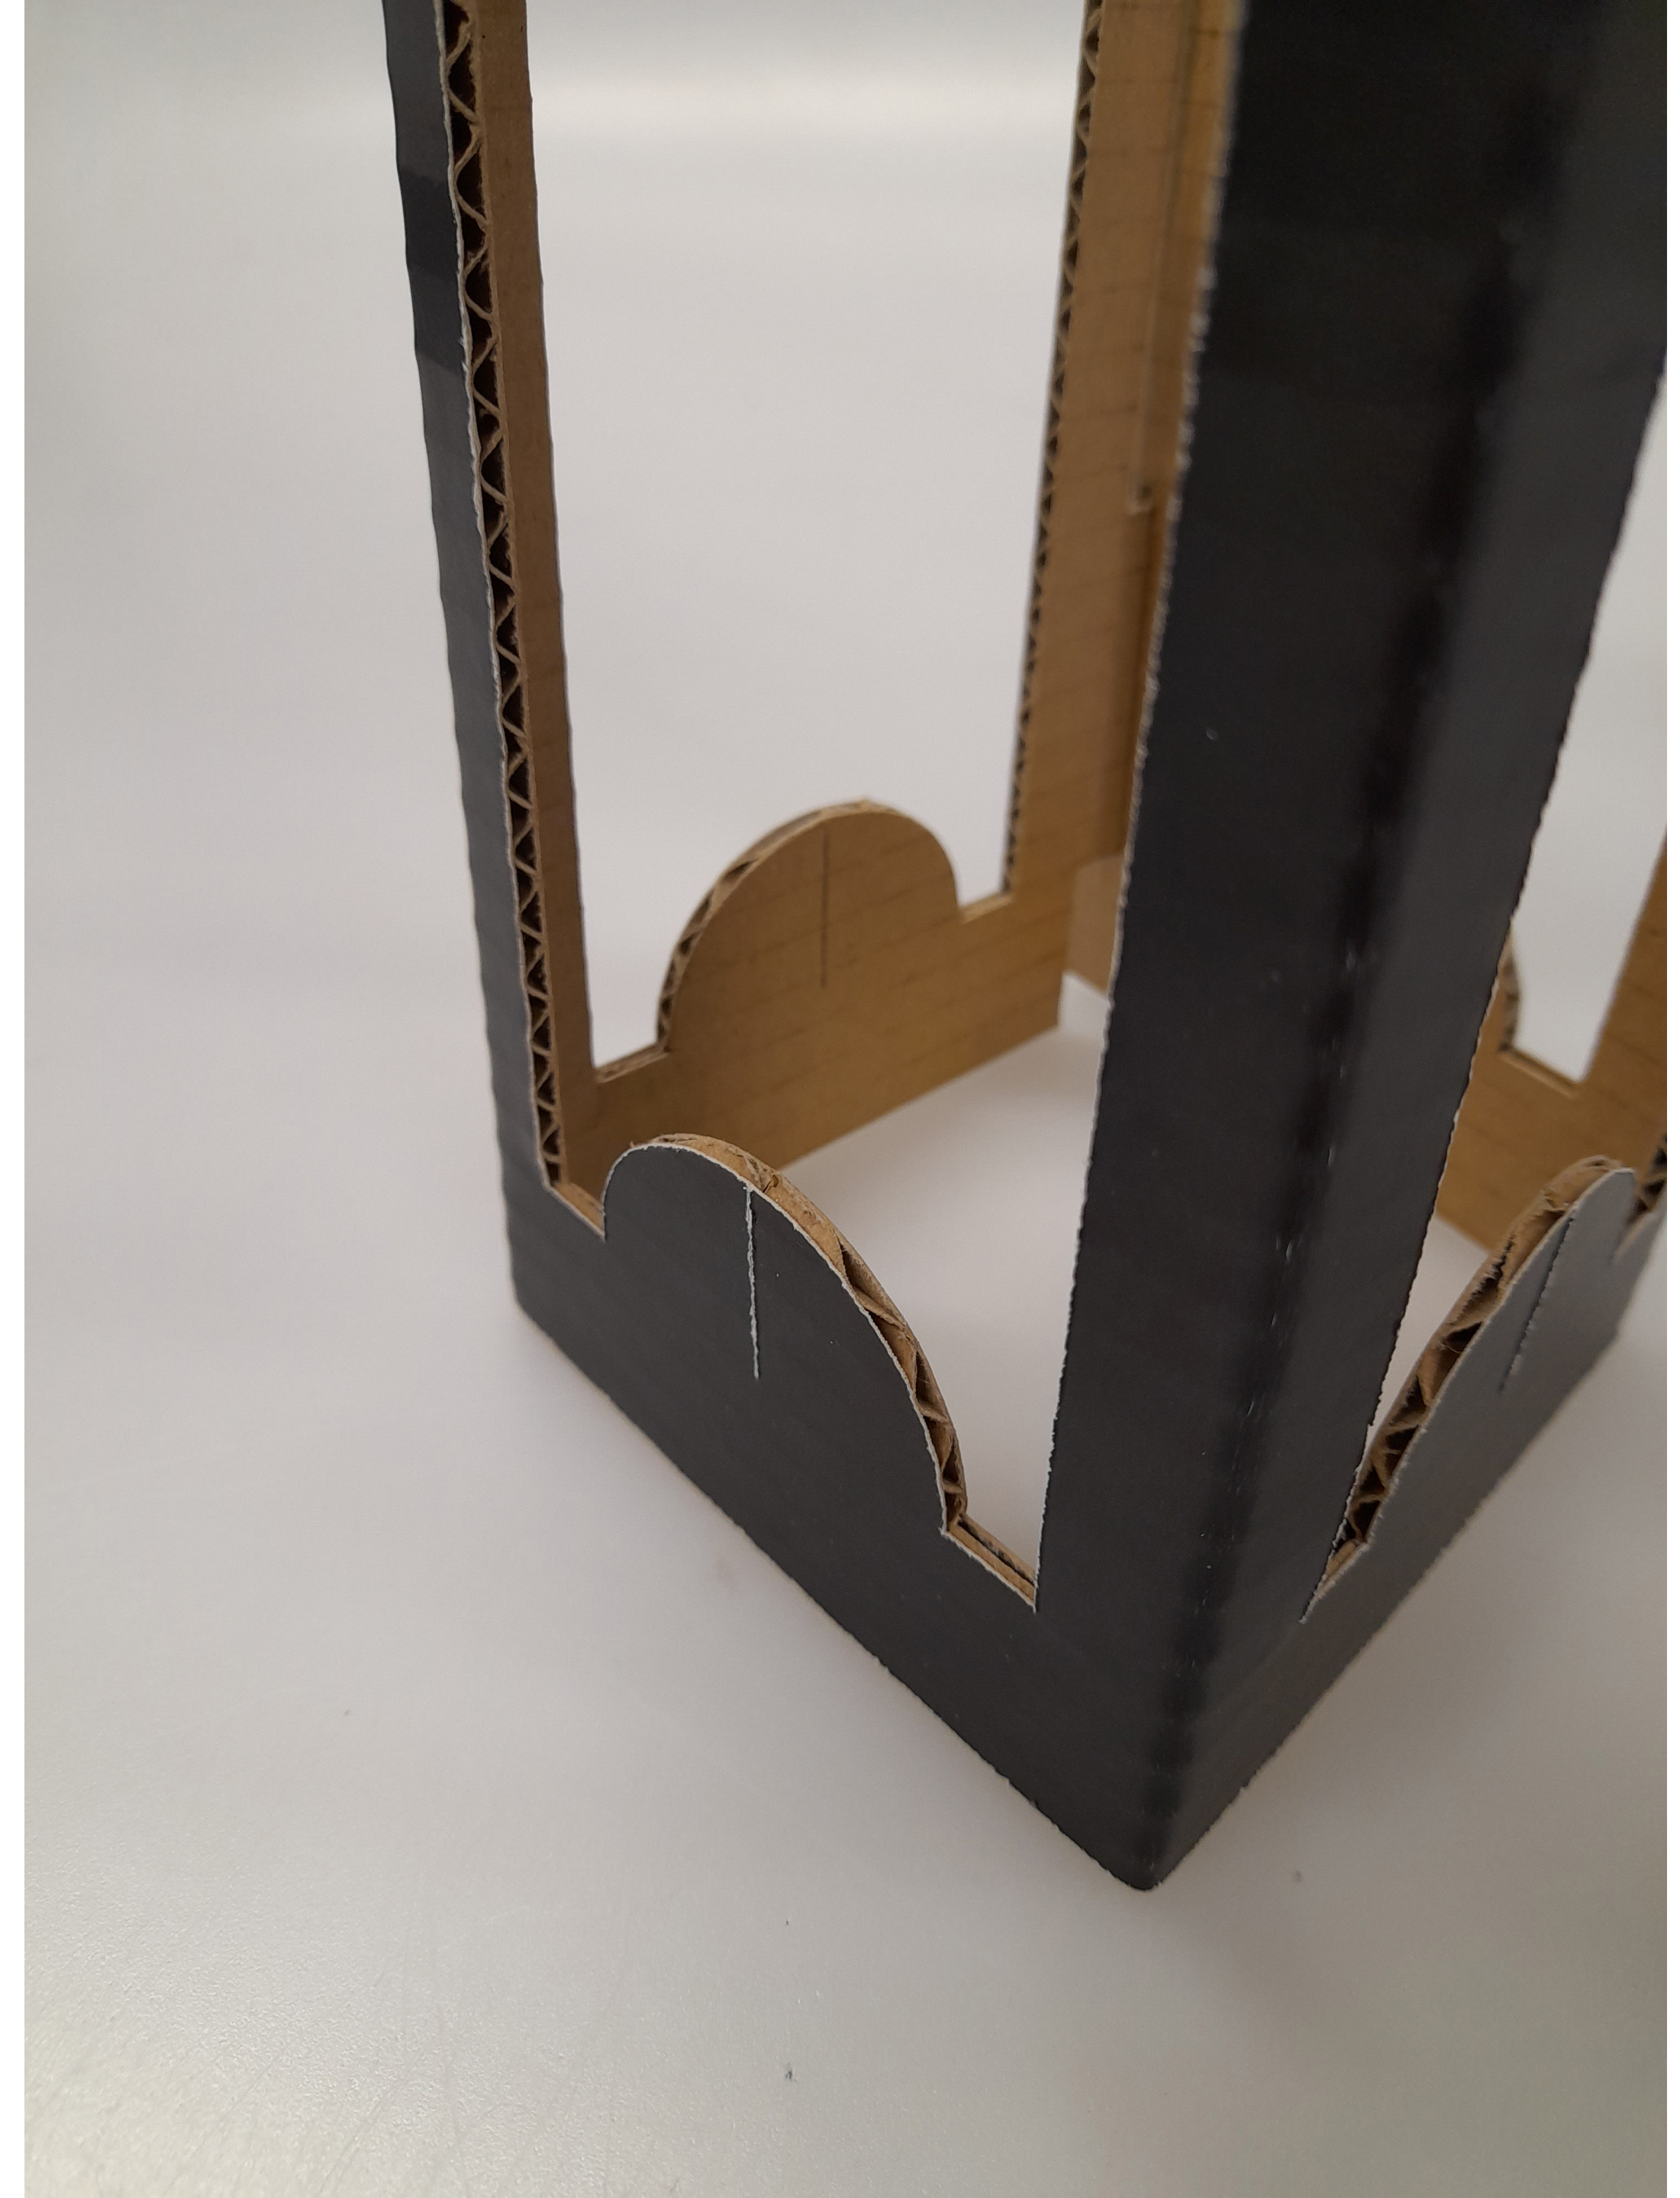

Packaging for cans

- the packaging is made of three-layer cardboard
- the construction of the package is made without gluing
- the packaging is designed for a set of four 500ml cans with a drink
- it can be used for alcoholic beverages as well non-alcoholic drinks

Holding system

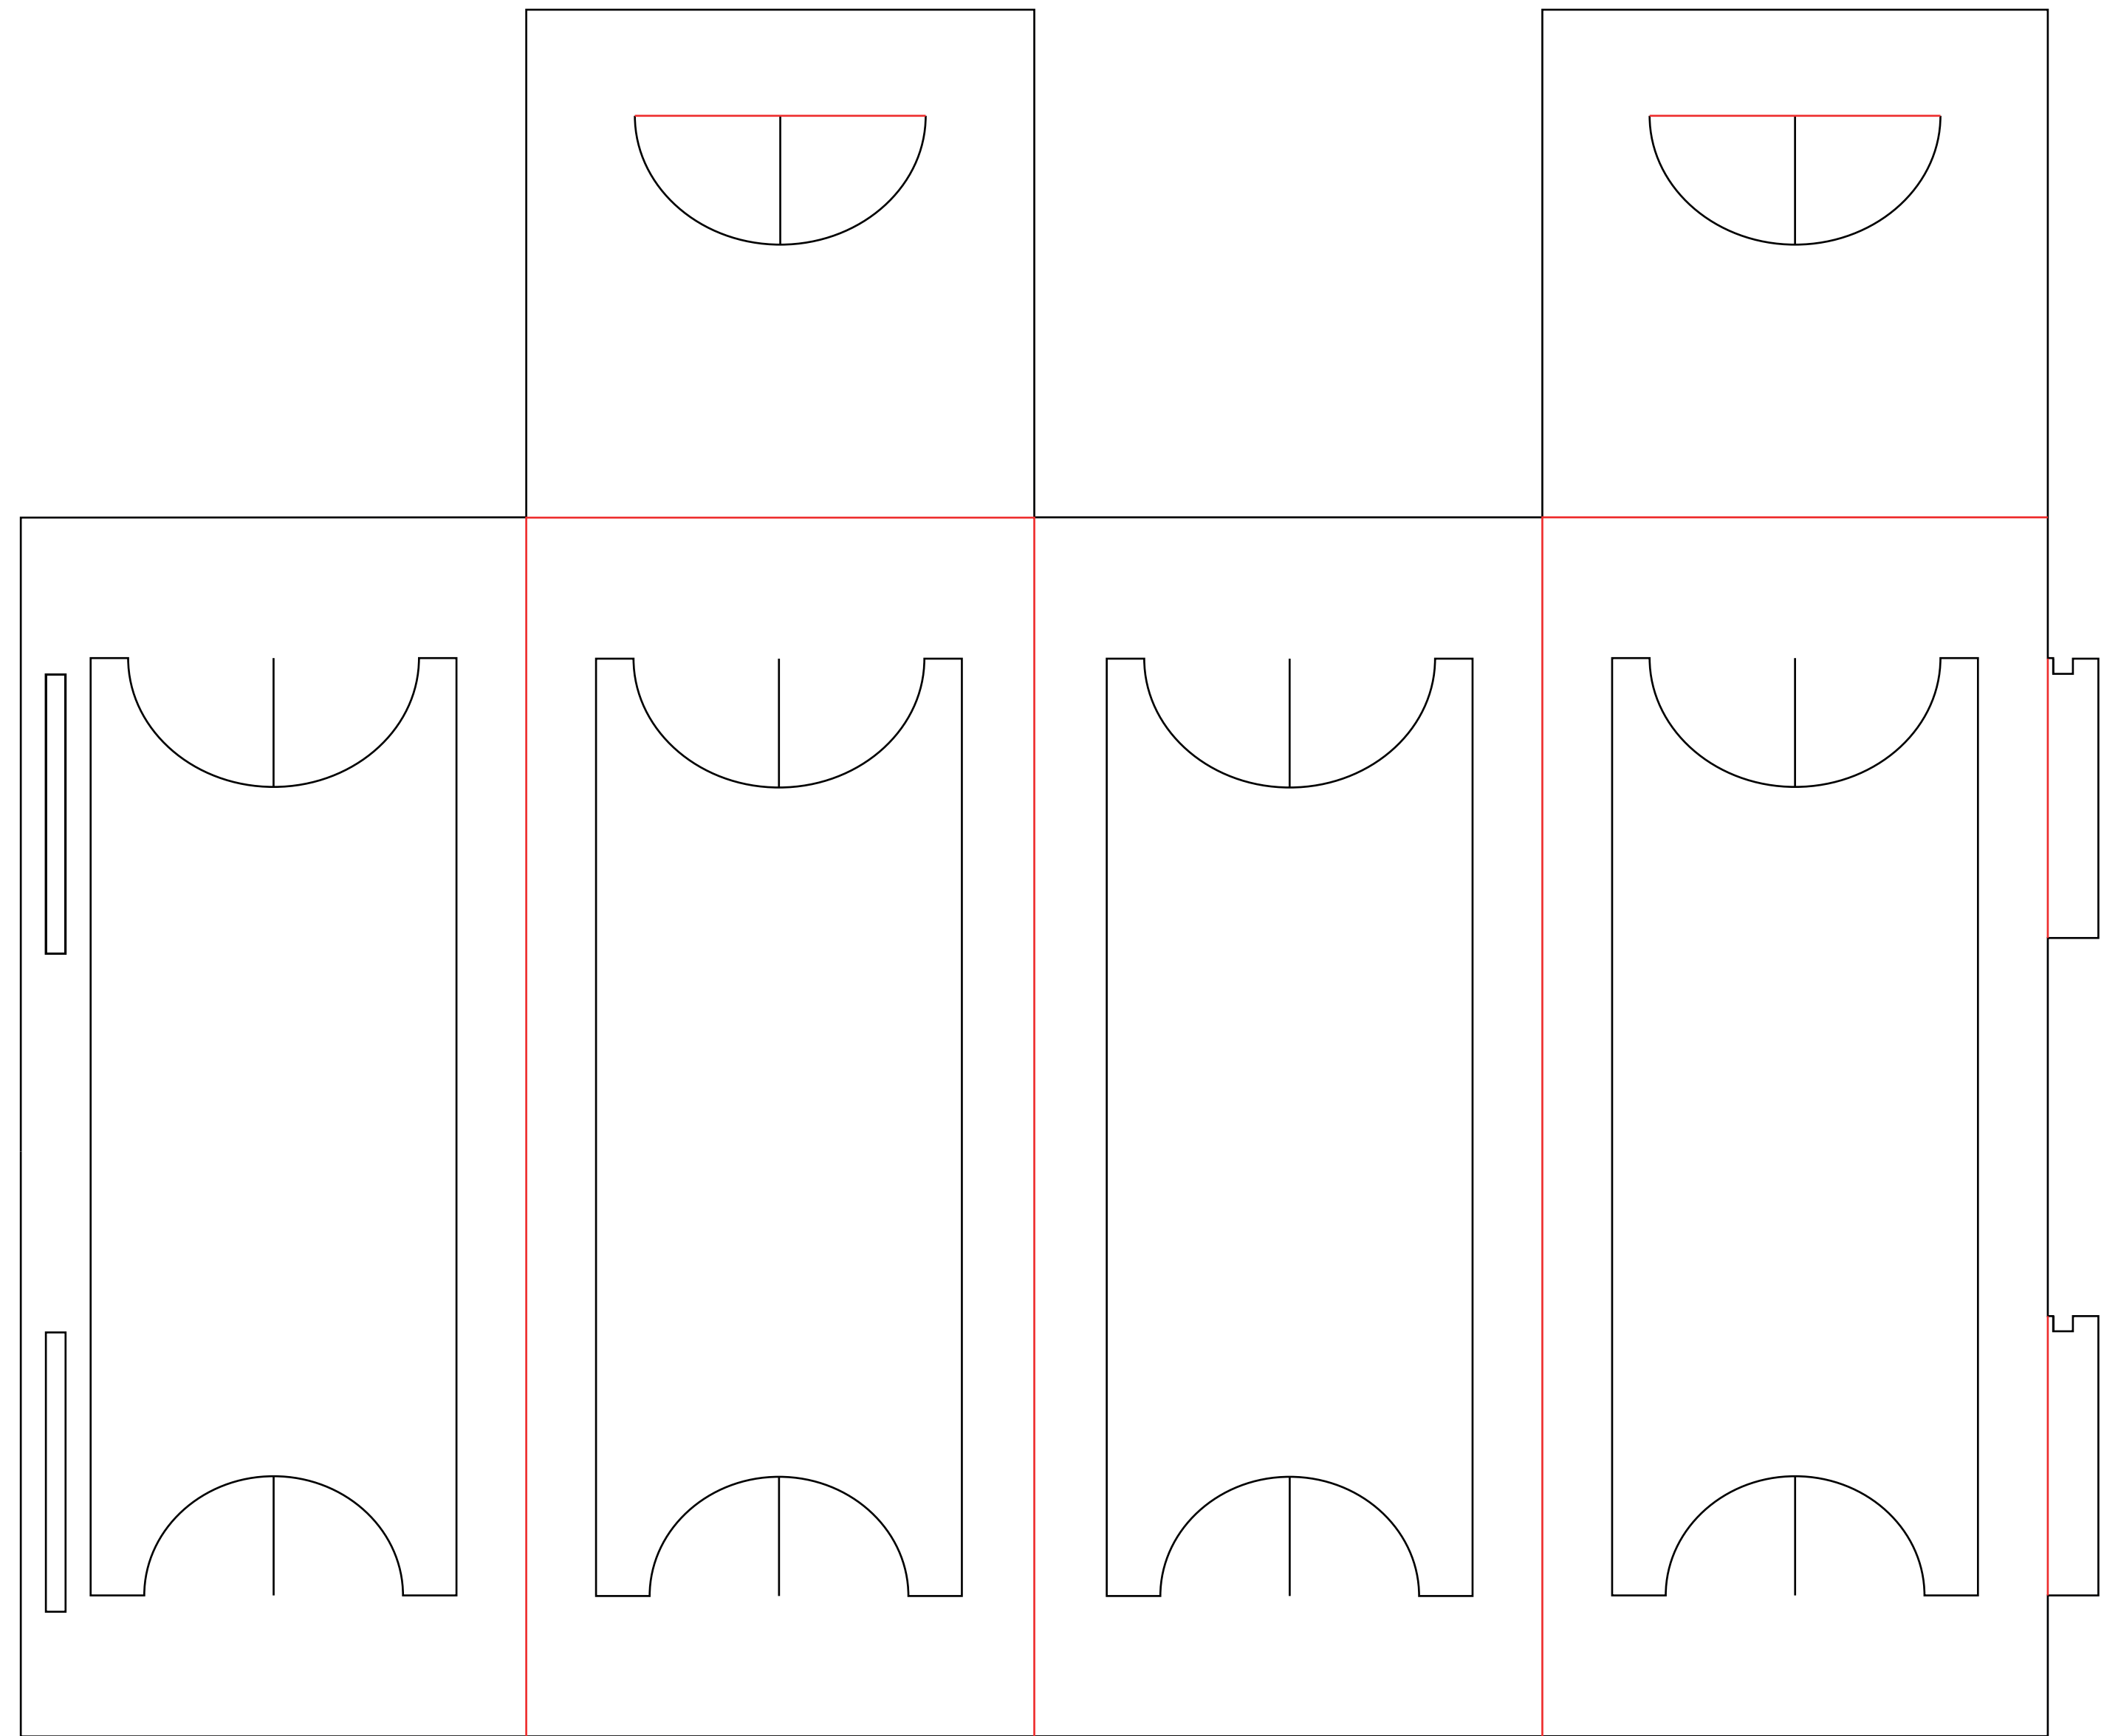

- cans are held on semicircular locks that are cut in the middle
- the quarter circles bend inside and outside the packaging, which ensures the stability of the sheets and prevents them from falling out of the packaging
- during transport, the top handle can be folded inside the package
- stability of the packaging is ensured on the lower square base and thanks to the weight the can will not tip over

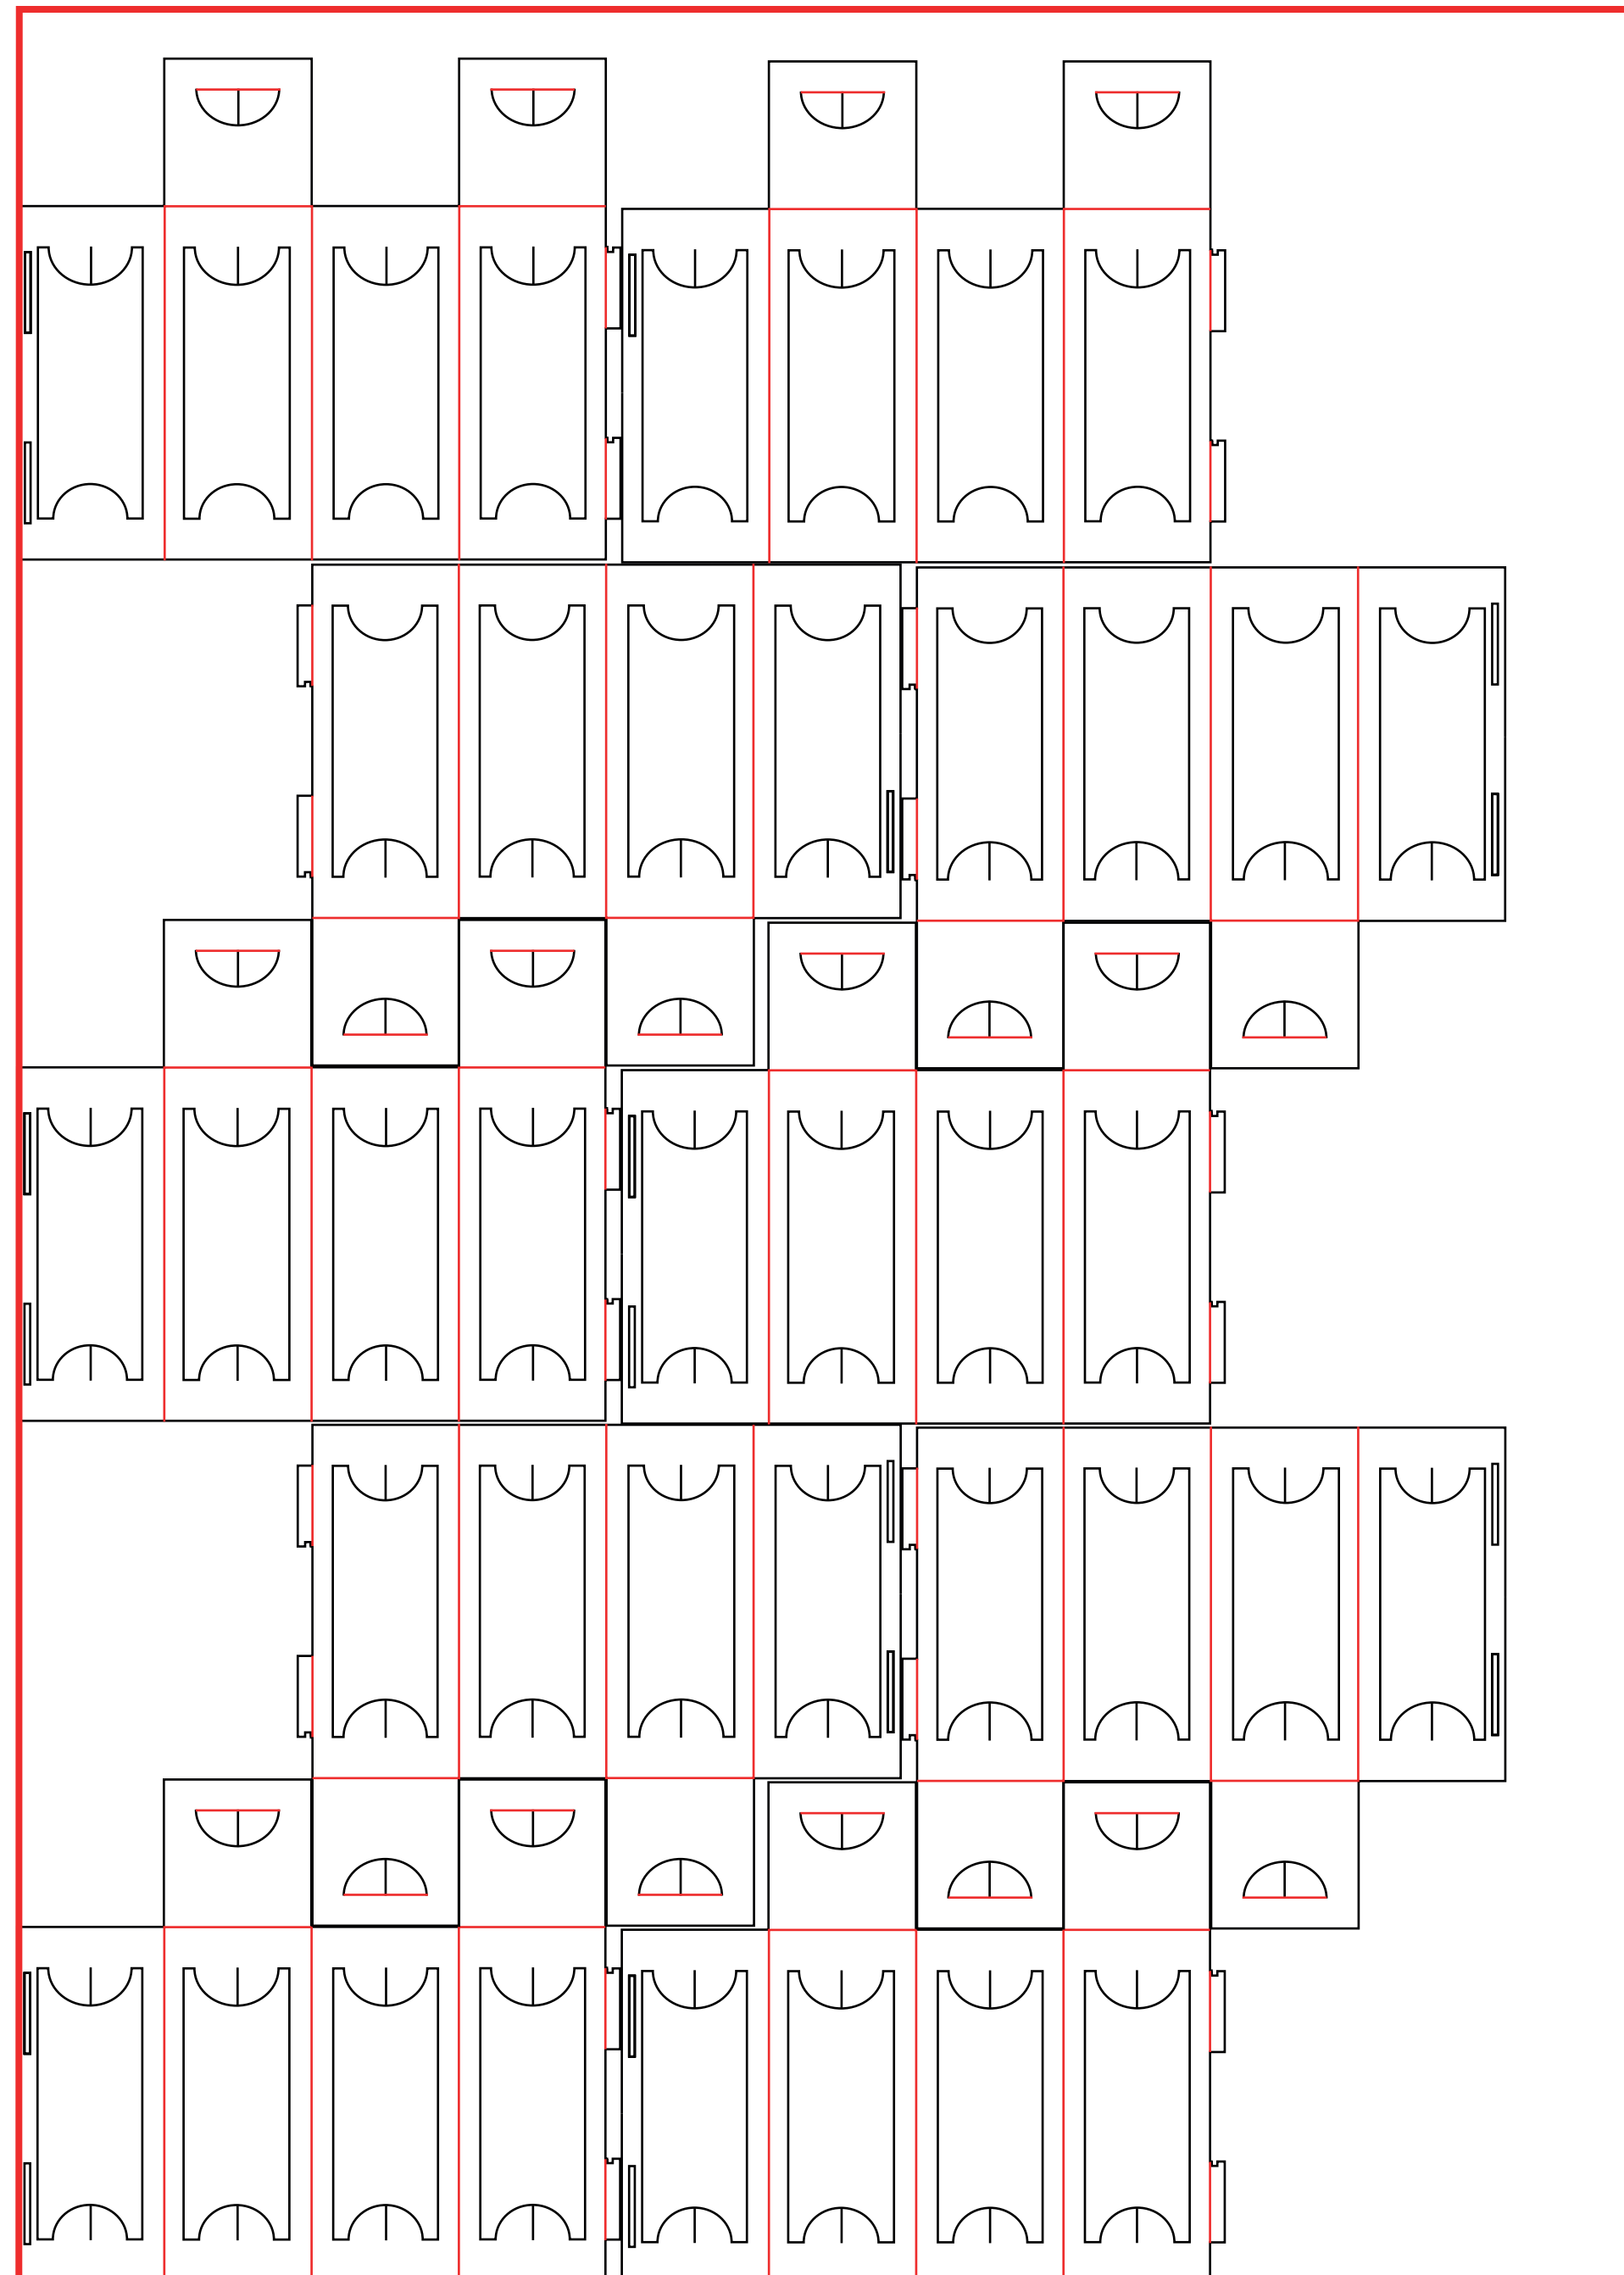

Wrap network

- 310x360 mm

Network of packaging on cardboard

- cardboard size 1000x1400 mm
- 10 pieces of packaging
