

# TREE STAND

Car air freshener stand in the form of a star with a cross-section for stable placement of the tree. The stand is made of durable plastic, which ensures strength and lightweight construction. A key feature is the non-slip layer that ensures the tree is in a stable position while driving. This design treatment not only enhances safety but also adds an aesthetic element to the interior of the car. It is a practical and attractive addition to the car for the Christmas season.
