

FOLDER

for PAPERS, TABLETS or IPADS

FOLDER FOR PAPERS AND TABLETS / IPADS

- The paper A4 doesn't fit into the boxes in a car without wrinkling and warping.
- Many people usually carry papers from work, from the office, employment contracts, requests from the doctor.
- These papers are placed by people on a seat or on a dashboard and from there they fall onto a dirty floor.
- The folder will help to keep a cockpit tidy and organized.
- Other usage is a space for tablet or iPad.

PLACEMENT IN A CAR

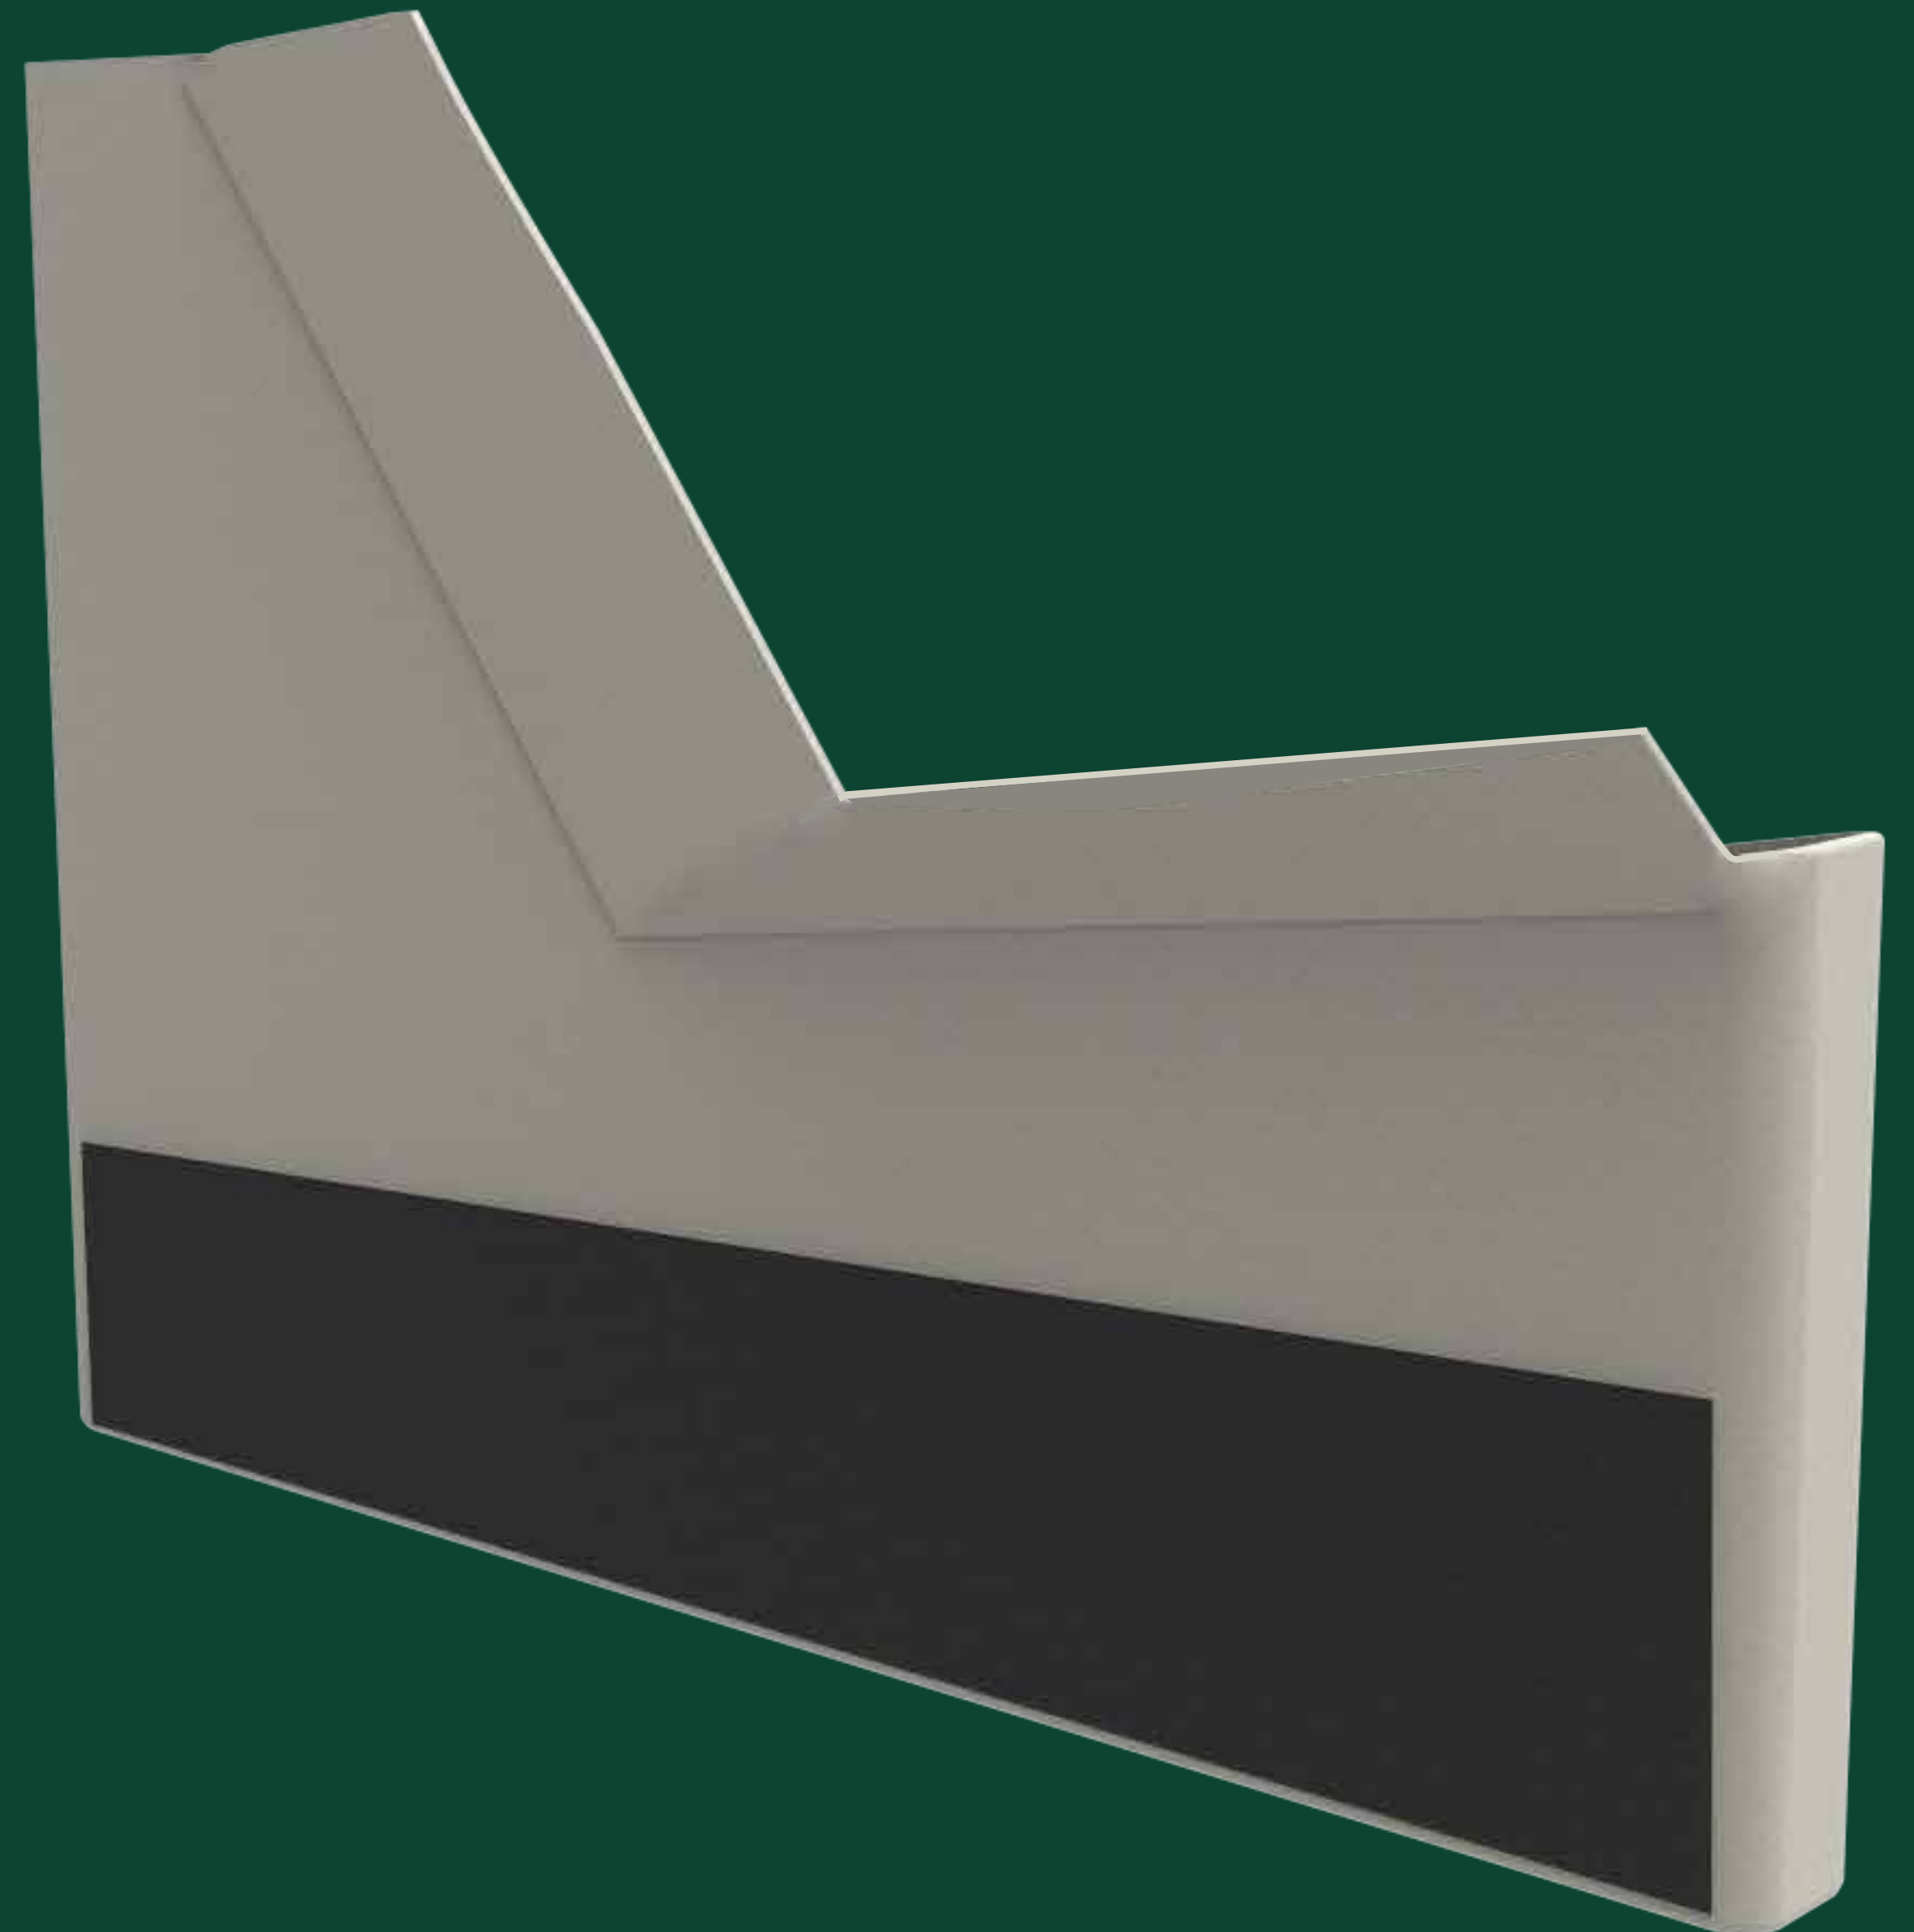

It is designed for Škoda Enyaq.
Central tunnel on a passenger side.
Folder is inspired by interior.

FIXING

Fixing system for my product is Velcro.

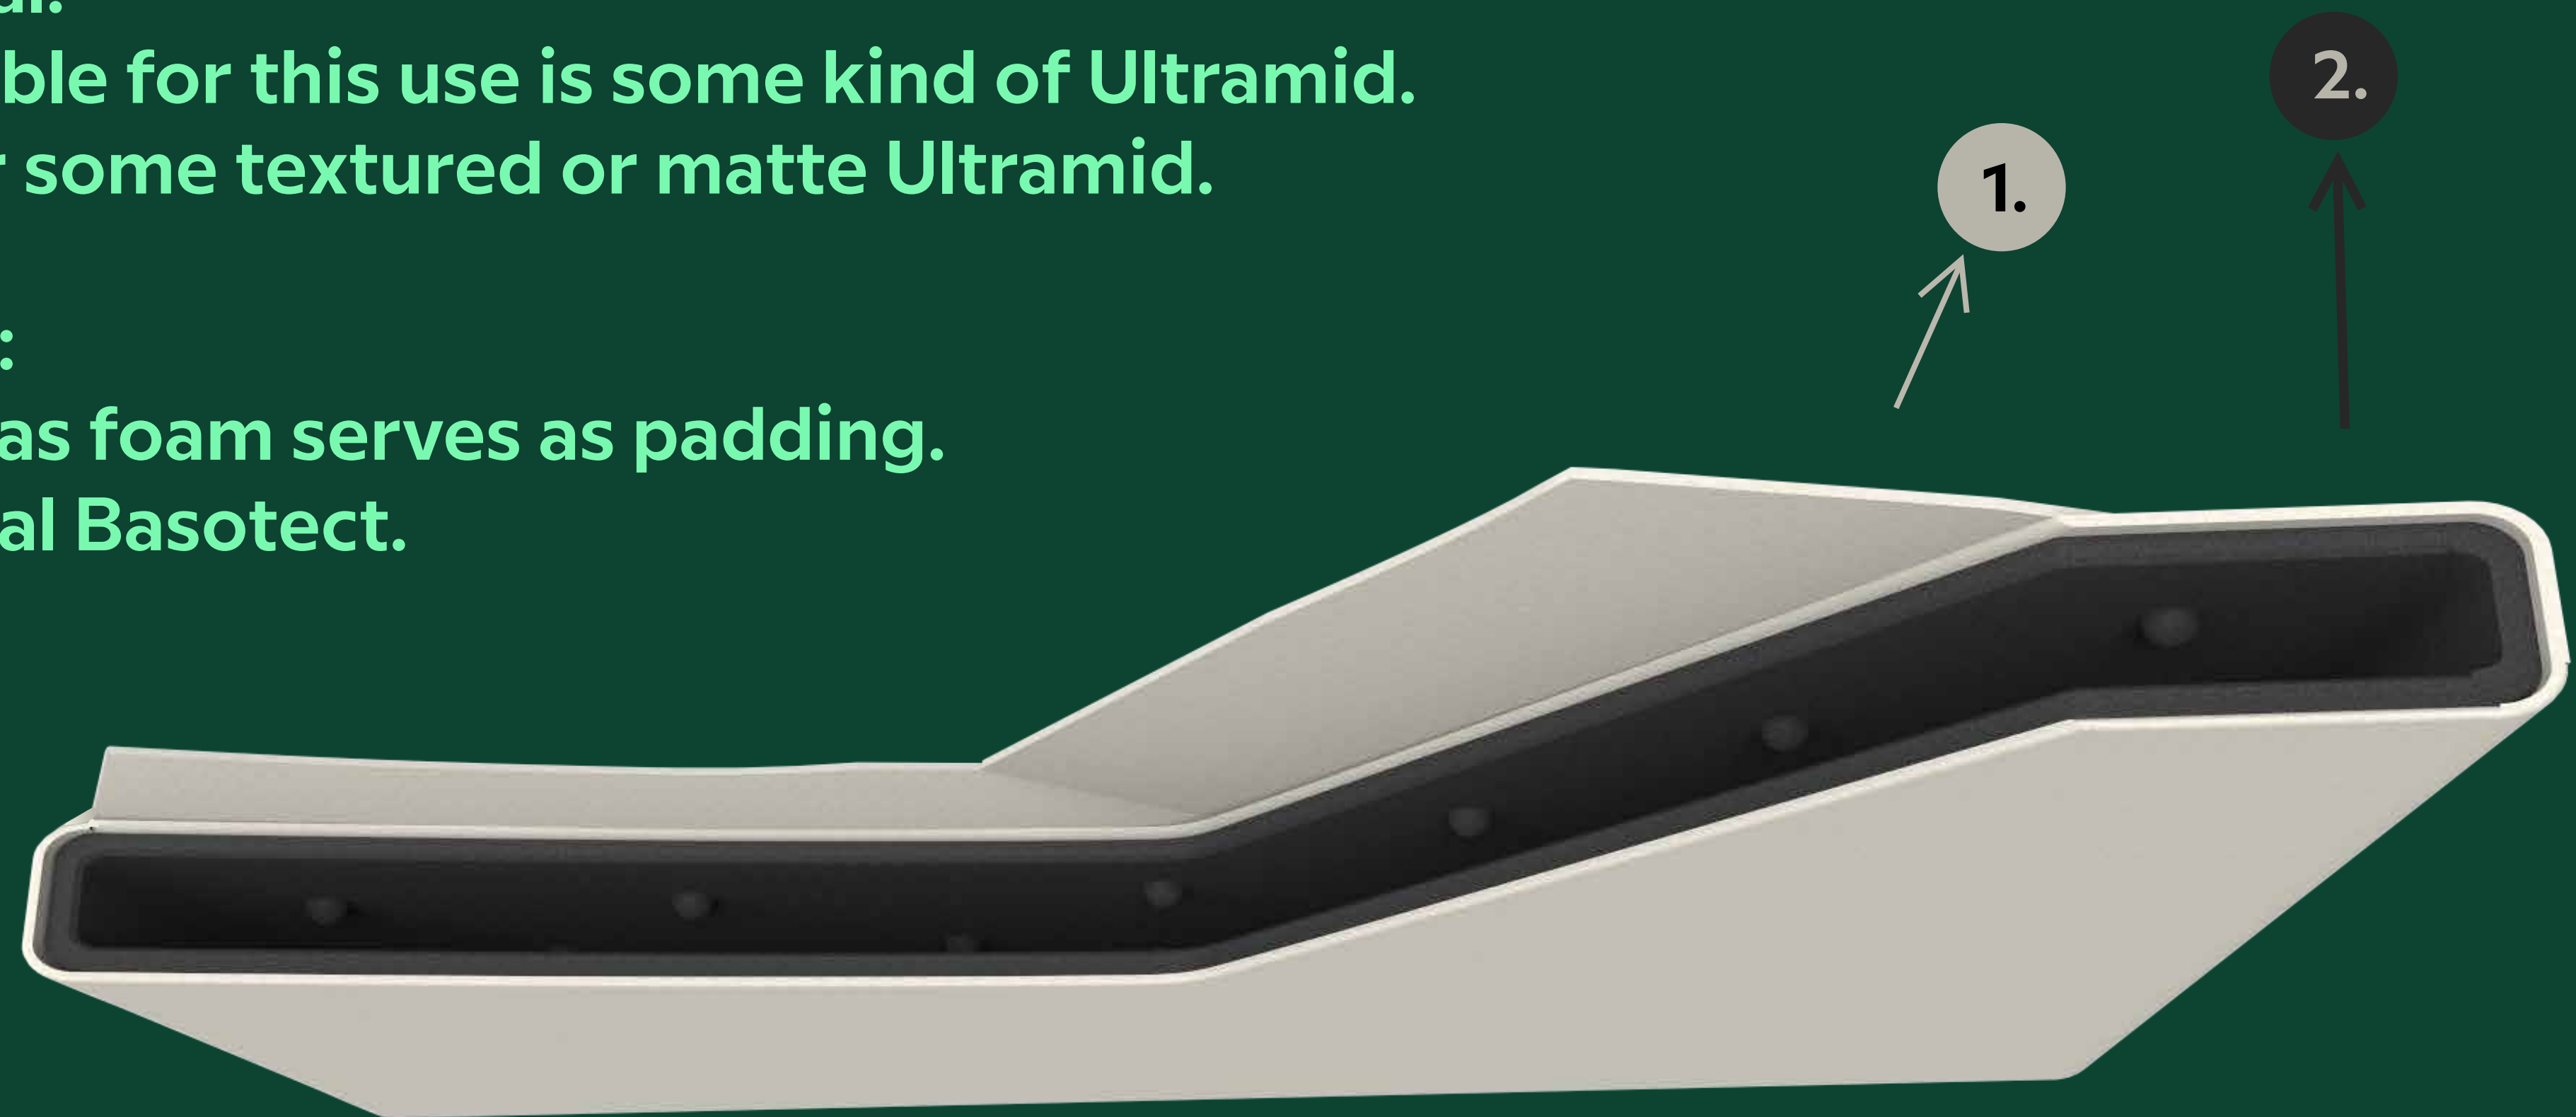

It is the same fixing system which Škoda uses for universal fixing elements into the trunk.

MATERIALS

1. Upper material:
Material suitable for this use is some kind of Ultramid.
I would prefer some textured or matte Ultramid.

2. Inner material:
Material such as foam serves as padding.
I chose material Basotect.

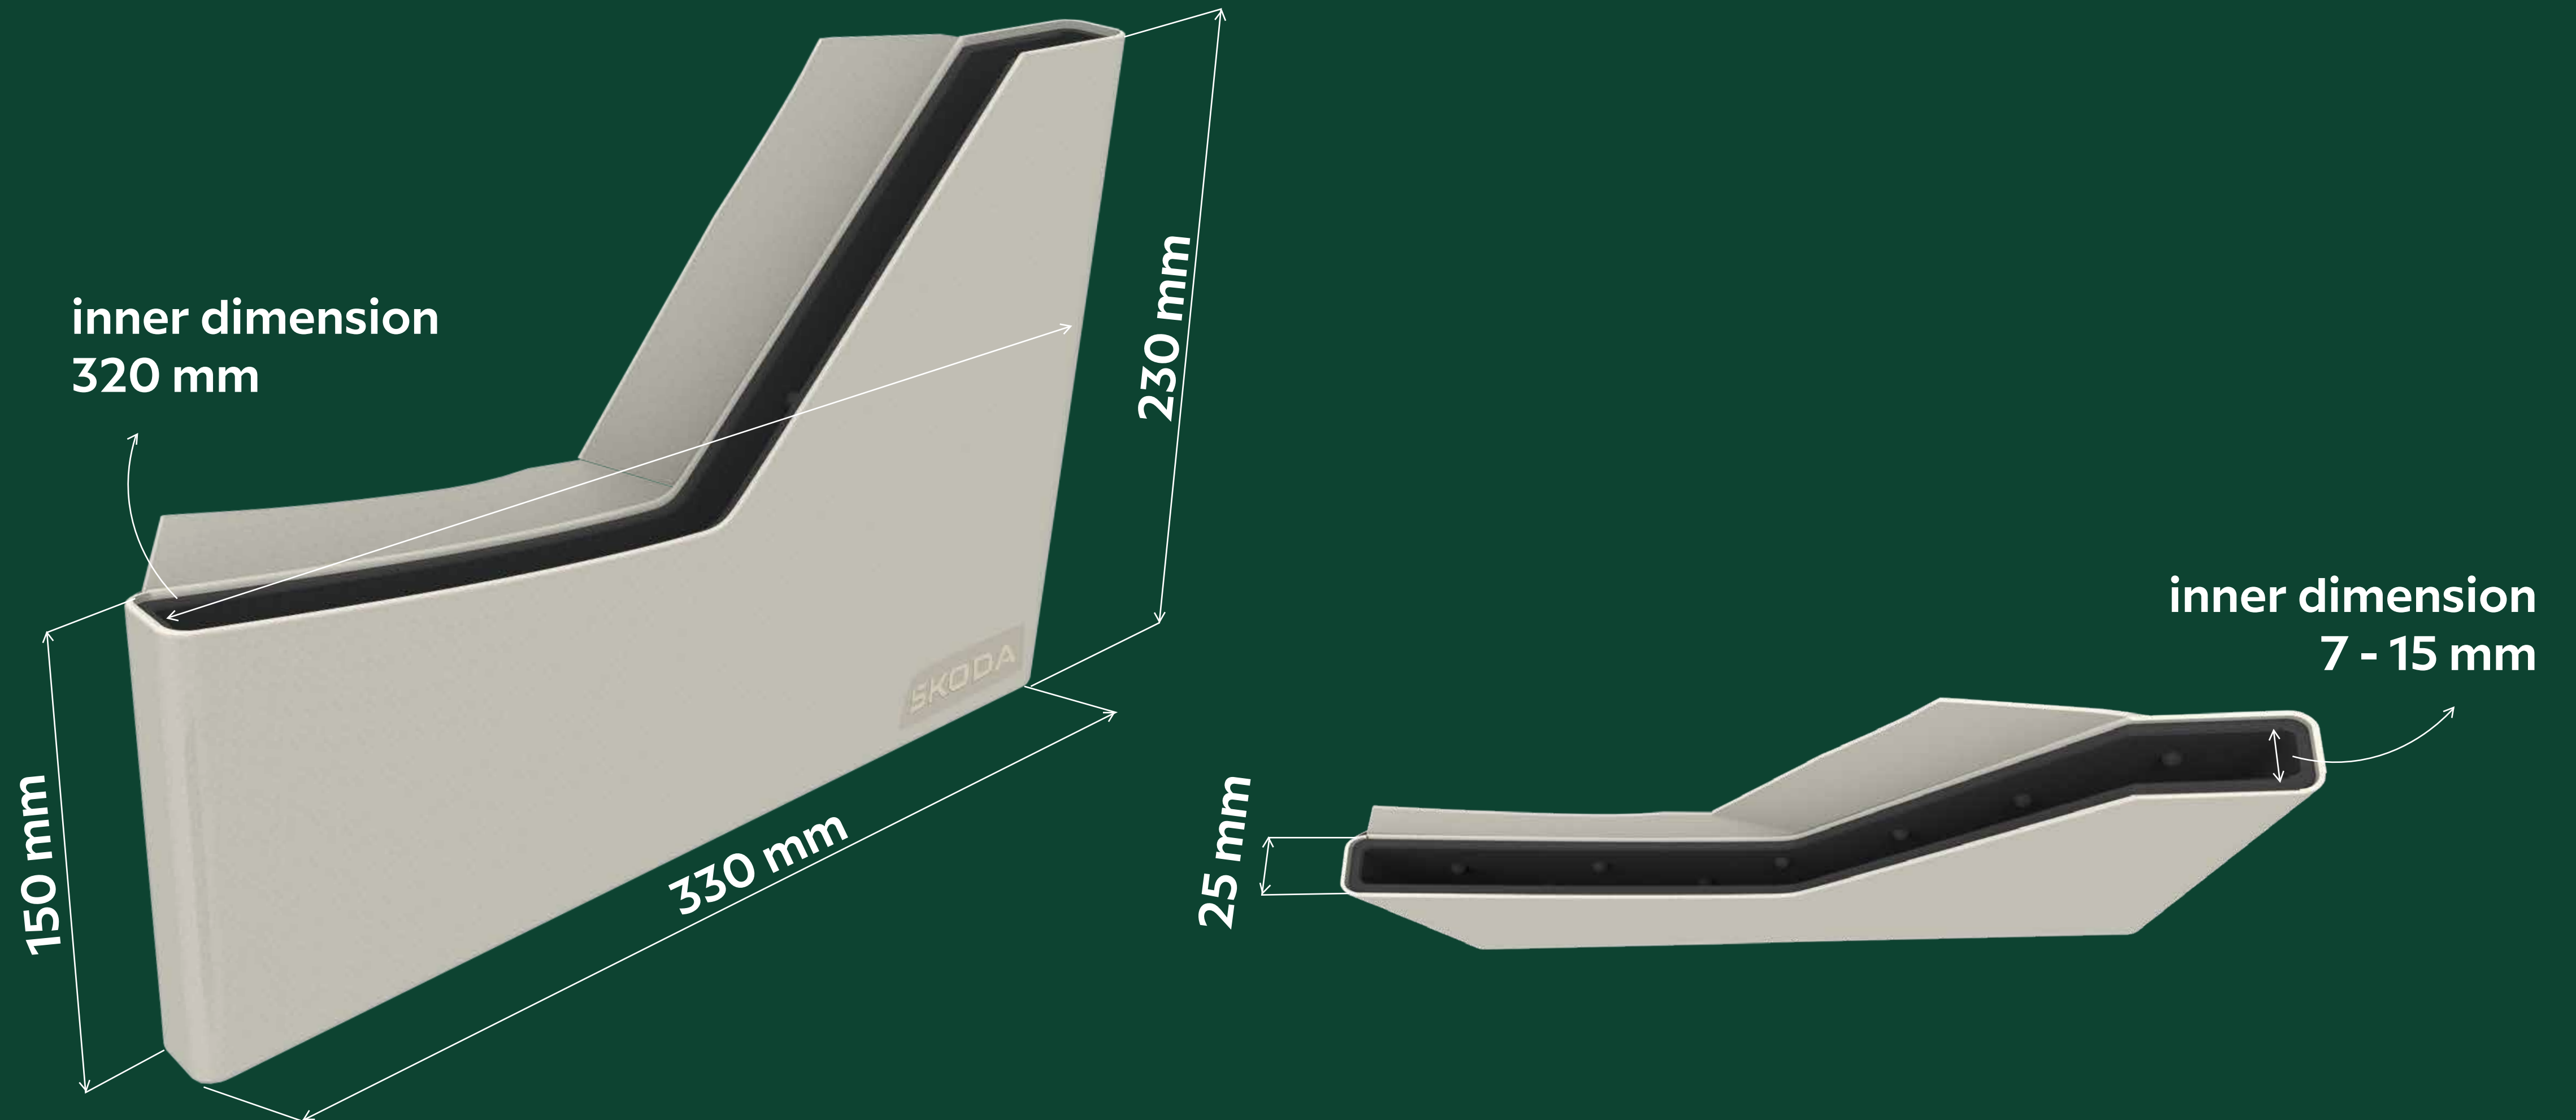

INSIDE OF THE FOLDER

Inside of the folder there is some kind of foam (Basotect) suitable for filling.

There is special structure to be able to store things with different dimensions.
The structure prevents unwanted movement.
