ANNOTATION

The central motif of the stand is a skull, which serves as an effective showcase for LSF belts. The structure offers a practical and customizable solution for hanging products and at the same time attracts attention with its industrial appearance.

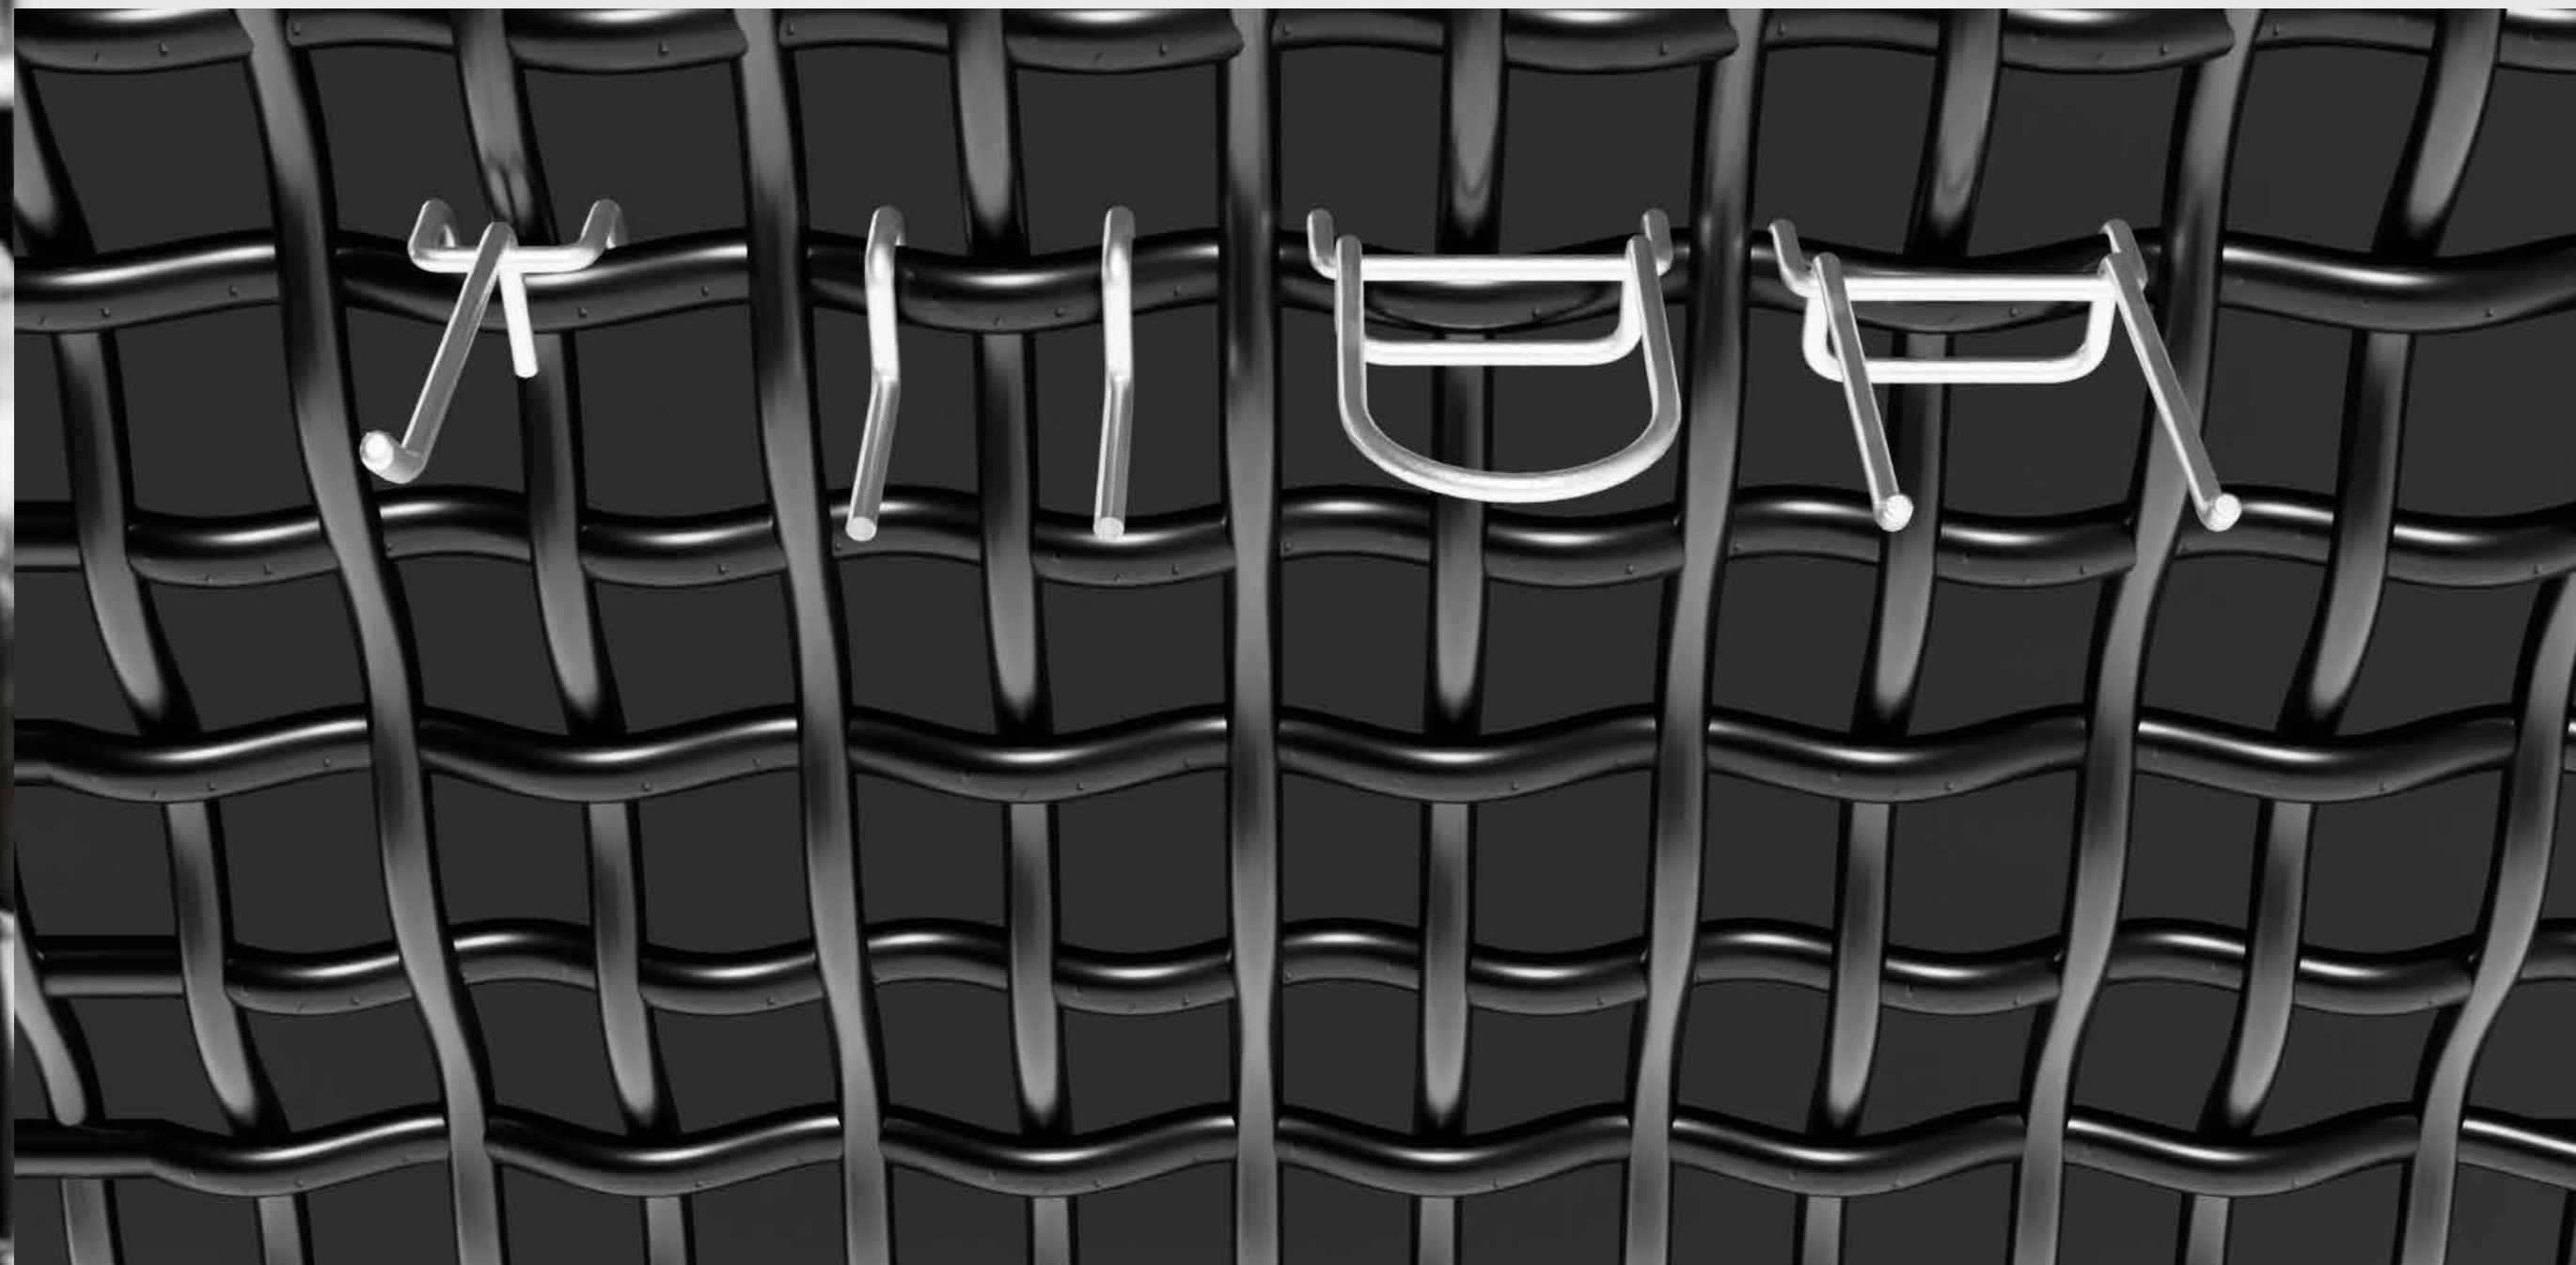

SUSPENSION SYSTEM

In the horns of the skull, there are hooks used to display belts, bracelets or chokers.

The reinforcement mesh surrounding the skull provides space for hanging other accessories thanks to using various hooks.

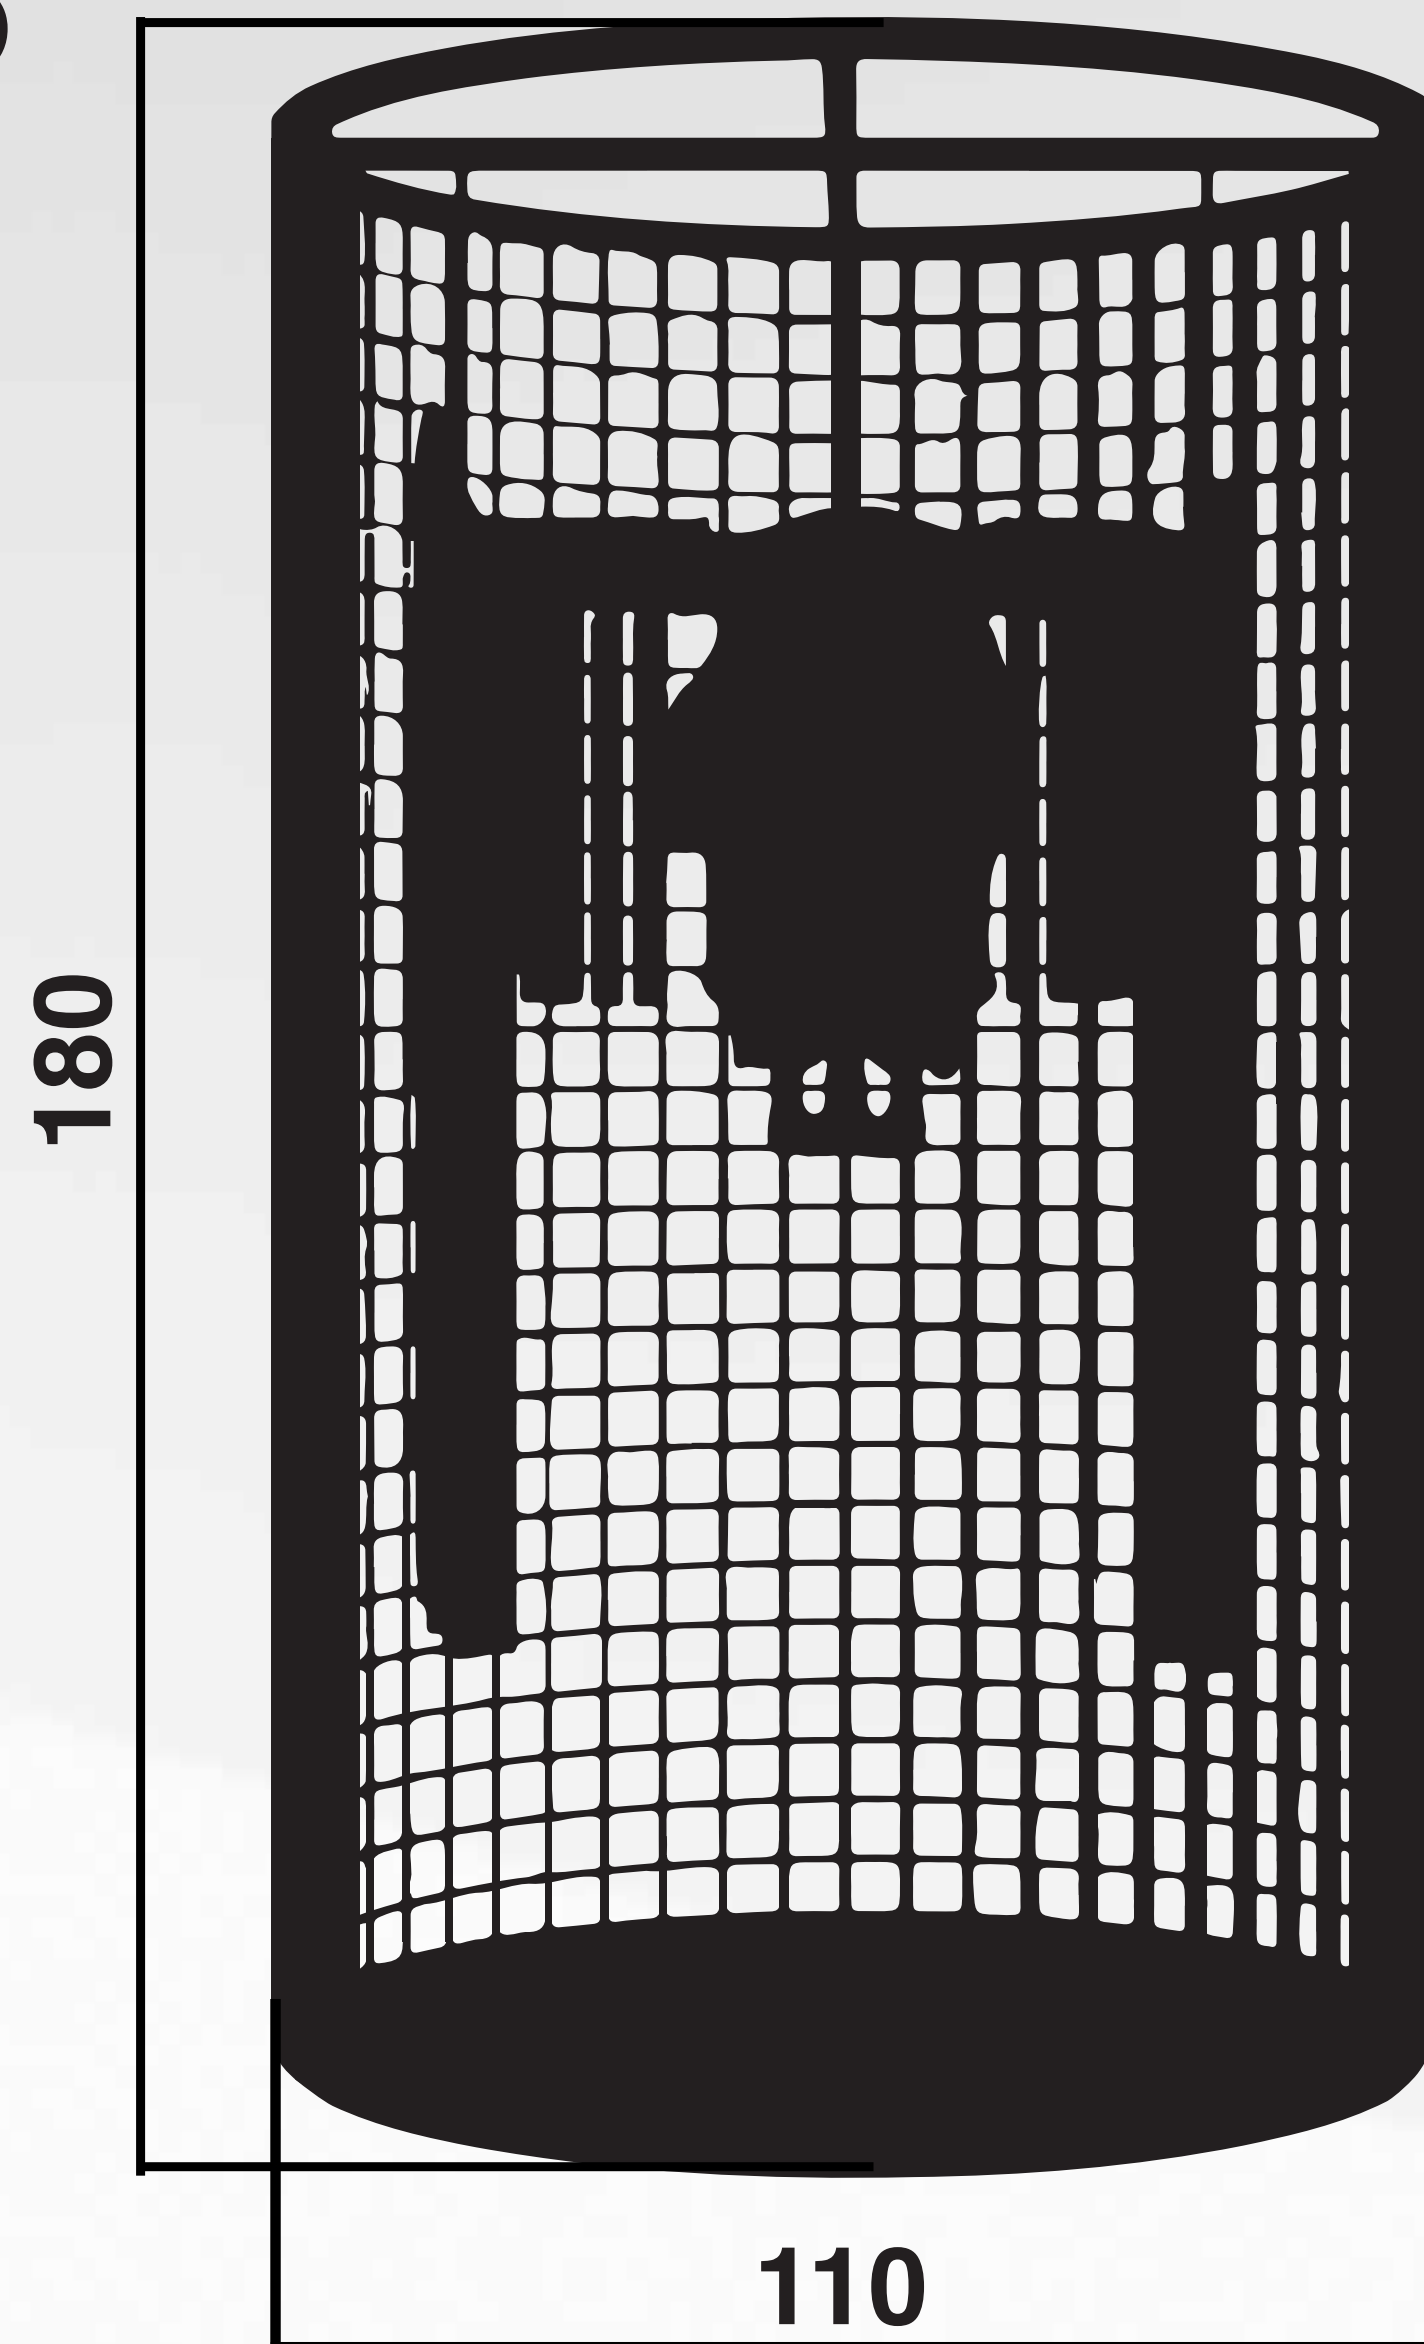

IDENTITY

Since the skull is the key element of the P.O.P. stand and attracts the most attention of the customer, the logo is strategically placed on its front.
